

Yacht Beam 6MM Searchlight

Nov 14, 2017 07:00 GMT

## ACR Electronics - METSTRADE: New Yacht Beam Searchlights Launched at METSTRADE

*METSTRADE, 14<sup>th</sup> to 16<sup>th</sup> November, Stand 03.131*

ACR Electronics and The Yacht Group have announced a joint venture to develop and market Yacht Beams, the most powerful and durable searchlights on the market.

The new 'Yacht Beam powered by ACR' series of one million and six million candela power searchlights are precision controlled via a military/commercial grade IP69 illuminating joystick (pending FCC approvals\*). In keeping with its long history of reliable wireless controlled products such as its Yacht Controller, The Yacht Group's Yacht Beams will also have an optional wireless control.

Designed to be easily retrofitted, Yacht Beams can be supplied with a complete swap-out kit for boats equipped with less powerful searchlights. HID lamps create a narrow-beam searchlight perfect for large sport yachts, mega-yachts, large sportfish and commercial vessels.

"We want to consistently provide a series of quality products with strong emphasis on safety at sea and through this partnership with The Yacht Group we are achieving that goal," said Gerry Angeli, President of ACR Electronics.

"The Yacht Group's proven control technology, strong field installation experience, and expertise in the yacht market has led to our strategic partnership in accomplishing this objective with ACR," agreed Gerald Berton, President of The Yacht Group.

The new strategic partnership combines safety expert ACR's commitment to providing high quality emergency and survival gear with The Yacht Group's innovative technology. The collaboration enables ACR's most powerful searchlights to be exclusively sold and enhanced by The Yacht Group and designed and manufactured specifically to yacht and commercial vessel specifications.

For more information on Yacht Beam and ACR Electronics' range of safety and survival products, visit the ACR Electronics Stand 01.131 at this year's METSTRADE.

*\* New Yacht Beam Controllers have not been authorised as required by the rules of the FCC. The product stated in this release, 'Yacht Beam', may not be offered for sale or lease until authorisation is obtained.*
