

ChartCo OneOcean Platform

Sep 04, 2018 08:30 BST

ChartCo - SMM 2018: ChartCo announces a comprehensive new integrated platform at SMM 2018

ChartCo OneOcean – the new dimension in e-navigation and compliance – to play a significant role in shoreside and fleet operations.

ChartCo, the global leader in digital navigation services and voyage compliance, has announced a completely new e-navigation and compliance platform at this year's SMM in Hamburg. The launch provides an insight into the future direction of the company, following a period of high investment in

product development.

ChartCo OneOcean is a unitary platform that will make life simpler for both mariners at sea and management teams ashore. It will play an important role in how shoreside operations and shipping fleets are managed, while also offering significant benefits to onboard crew.

OneOcean is set to become the ultimate platform for global compliance needs in navigation, environmental, safety, and regulations management, bringing together a comprehensive suite of products:

- PassageManager – the newly updated e-navigation and compliance solution
- Regs4ships – to maintain compliance with flag state and international regulations
- FleetManager – unlocks real-time shore-side vessel tracking and management
- EnviroManager – to ensure environmental compliance
- Docmap – to meet safety and quality compliance obligations

A notable feature within OneOcean is the incorporation of data from ChartCo's market-leading environmental solution, EnviroManager, which helps crews comply with MARPOL, regional and national regulations. An integral function within OneOcean, EnviroManager helps crew effectively plan the handling of waste – minimising the risk of a faulty discharge with the associated fines and reputational damage – by clearly displaying baseline information for every nation.

Another powerful feature of OneOcean is its ability to integrate future applications and third party products, both onboard and onshore, further unifying and simplifying fleet operations.

The OneOcean platform, in combination with the upgraded PassageManager navigational module, will offer mariners an even faster route to crucial navigation, environmental, regulatory, safety and quality compliance management, all with increased cyber resilience.

About ChartCo

ChartCo is a global leader in digital navigation services and voyage compliance solutions. Its team of marine specialists is dedicated to simplifying navigation, environmental and regulatory compliance, safety management and fleet tracking to improve the efficiency and profitability of shipping operations. Offering the broadest range of software solutions on the market, ChartCo is leading the field in providing e-navigation and compliance solutions for the maritime industry.

ChartCo OneOcean - the new dimension in e-navigation and compliance - is the unitary platform at the core of ChartCo services. Key applications within the platform include PassageManager, Regs4ships, EnviroManager, FleetManager and Docmap. ChartCo received the 2018 SMART4SEA e-Navigation Award in recognition of its accomplishments in facilitating the transition to digital navigation in commercial shipping through its range of software solutions for vessels and shoreside operators. ChartCo's services are used aboard over 13,500 vessels across the globe.
