ChartCo's LogCentral application receives Marshall Islands flag state authorisation

ChartCo's innovative digital logbook solution has been recognised by the Republic of the Marshall Islands Maritime Administrator as a crucial regulation reporting tool.

ChartCo's LogCentral, the latest, smart, integrated solution soon to join the ChartCo OneOcean platform, has gained authorisation from the Marshall Islands. Having authorised the application on their flagged fleet, they lead

the way for ChartCo to obtain recognition from other key flag states.

The new addition to ChartCo OneOcean will enable crew to rapidly complete logbook entries with simplicity and accuracy. Operational and management teams will also benefit from transparency and traceability while having instant access to all logbook entries made across the entire fleet.

"This application is a highly effective paperless logbook solution for record keeping, monitoring and compliance verification, significantly simplifying life for those onboard and onshore," said Tony Brown, Head of Product Strategy, ChartCo.

With new regulations from MARPOL, notwithstanding the EU MRV and IMO DCS regulations, more than 50,000 vessels worldwide are required to carry out extensive record-keeping operations, facing severe penalties if these processes are executed incorrectly.

About ChartCo

ChartCo is a global leader in digital navigation services and voyage compliance. We provide market-leading solutions that reduce the cost of ship

operations, improve situational awareness to owners and crew and assist with the ever-increasing levels of regulatory compliance.

In September 2018, ChartCo launched its revolutionary new platform, OneOcean, which fully integrates the entire suite of ChartCo's navigation, compliance and shoreside monitoring applications – PassageManager, Regs4ships, EnviroManager, Docmap and FleetManager – to provide the highest quality of service in route planning, navigation management, shoreside operations and maritime regulations management.

Today we have more than 13,500 vessels purchasing our products and services each year.

We hold the 2018 SMART4SEA e-Navigation Award in recognition of our accomplishments in facilitating the transition to digital navigation in commercial shipping through our range of software solutions for vessels and shore side operators.
