Cox Powertrain - DSEI: Cox Powertrain to Reveal CXO300 Engine Controls and Display Systems

DSEI 2017, ExCel, London, 12th to 15th September, Stand S10-360

Tuesday 12th September - Following the recent announcement of Cox Powertrain's collaboration with Xenta Systems and Murphy by Enovation Controls, Cox Powertrain will reveal the exclusive engine control and display systems that have been chosen for the company's high powered diesel outboard engine, the CXO300 at this year's DSEI.

Italian controls specialist, Xenta Systems has been chosen to supply the engine controls system, which incorporates the joystick, throttle for the CXO300. Murphy by Enovation Controls will supply its new PowerView®1200 display screen offering full-featured engine diagnostics on a powerful display screen.

As the first company to develop and patent the intuitive joystick control system, Xenta System works closely with retrofit and OEM production markets to offer a fully integrated engine control package, resulting in a highly intuitive control system that provides seamless maneuverability of craft in close quarters.

Murphy by Enovation's PowerView® display systems offer fully featured, configurable displays and easy-to-read operator interfaces. As Murphy's largest engine display system, the new [PowerView®1200](#) was chosen for its power, large memory and excellent connectivity. The 12.3-inch, glare-free LED screen, can be easily viewed, even in full sunlight and the display is fully bonded making it a perfect solution for all types of environments and applications.

Those wishing to keep up to date with the CXO300's progress can sign up online to receive Cox Powertrain's regular news updates at www.coxmarine.com

About Cox Powertrain

Cox Powertrain is a world-leading British designer and builder of marine diesel outboard engines developed for worldwide and multi-market applications.

Based on the South Coast of England, Cox Powertrain is backed by the Ministry of Defence and a solid shareholder base of private and institutional investors. As a result, the company has been able to implement a long-term development programme of ground-breaking new products.

Led by ex-Cosworth CEO, Tim Routsis, whose background lies in engine development in global automotive, aerospace and marine markets, the company's mission is to deliver a completely new concept in diesel engines that has the potential to revolutionise the marine market.

With a strong pedigree in Formula 1 racing and premium automotive design, Cox's highly skilled team of engineers has decades of experience in combustion engines and understand the many difficulties customers are challenged with.

Cox's first ground-breaking diesel outboard engine, the CXO300, is the

highest power density diesel outboard engine ever developed. As a low weight, high power, single fuel engine, the CX0300 delivers the same performance and efficiency of an inboard but with the convenience and flexibility of an outboard.
