Fischer Panda UK Announces Growth with UK-wide Service Partner Network to Support Autoclima Customers

Commercial Vehicle Show, 18 – 20 April 2023, NEC Birmingham, Stand 5E92

Fischer Panda UK will be announcing further growth within the automotive industry with the introduction of its new UK-wide service support network at this year's Commercial Vehicle Show which has been developed following a successful first year in partnership with leading air conditioning manufacturer, Autoclima.

Fischer Panda UK signed an exclusivity agreement with Autoclima at last year's show, strengthening their comprehensive offering of efficient and green integrated power and HVAC systems for the automotive industry. This year, the Show provides an opportunity for the new service partner network to meet and collaborate with Fischer Panda UK and showcase Autoclima's cutting-edge AC systems to the UK commercial vehicle market.

The new service network will offer the growing Autoclima customer base both supply and install solutions as well as aftersales support and technical backup at a more local level with its strategic locations across the UK, creating a comprehensive aftersales and servicing provision within the commercial vehicle market.

Business partners will be attending an Introduction Day at Fischer Panda UK headquarters in Dorset in March to officially join the UK-wide network, this will be strategically developed in the coming years.

Vehicle & Specialist Applications Sales Manager, Ian Saunders, said: "Fischer Panda UK has built a strong business partnership with Autoclima since last year's show and we are delighted to now develop this arrangement further with a reliable network of service partners across the UK. The growing network allows us to offer faster, more responsive solutions to our customer base with the assurance that they are dealing with an approved partner of Fischer Panda UK / Autoclima.

"Each Fischer Panda UK partner will be formally certified as an 'approved service partner' and will have a presence on our new website with the technical expertise and service guarantees to support the supply and installation of Autoclima systems."

As providers of integrated power and HVAC system solutions to the automotive and specialist vehicle sector, Fischer Panda UK can support simple spot cooling for problem areas and provide ways to accurately control the whole on-board environment, with system design to suit any vehicle application, added with top-class servicing and aftercare.

About Fischer Panda UK

Fischer Panda UK Ltd offers full-system design capability, servicing and aftercare as a leading distributor of diesel generators, air-conditioning systems, hybrid electric solutions and integrated mobile power solutions for a variety of commercial and specialist application vehicles.

Renowned worldwide as innovative, reliable and extremely quiet, the extensive Fischer Panda range of compact diesel generators includes its next generation highly efficient and powerful variable speed iSeries-Generators. Other world-class products from Fischer Panda UK include mobile power solutions working as the sole UK automotive distributor for Mastervolt and a wide range of refrigeration and air conditioning solutions as the UK exclusive distributor for Autoclima.

Fischer Panda UK was among the first companies to achieve ISO UKAS 9000:2015 accreditation and operates from a purpose built 9,000 sq. ft facility in Verwood, Dorset.

Active in the military and automotive sectors, the company works with UK MOD and other military units around the world providing solutions for specialist vehicle and land-based applications. Two thirds of Formula 1 mobile truck units install Fischer Panda generators, as do the BBC, Sky and many other mobile broadcasting vehicles.

Operating since 1977, Fischer Panda GmbH is headquartered in Paderborn, Germany. The Fischer Panda team covers more than 500 technicians and partners in over 90 countries worldwide.
