Fischer Panda UK Announces Service Partner Network Developments at the Commercial Vehicle Show

Fischer Panda UK recently announced further growth within the automotive industry with the introduction of its new UK wide service network, supporting UK customers of leading air conditioning manufacturer, Autoclima.

The new network partners met at Fischer Panda UK's offices in March for an introductory day and will be meeting once again to launch the network to the industry at the Commercial Vehicle Show.

Fischer Panda has carefully selected its partners to ensure that they can offer the level of service required in both supply and install solutions as well as aftersales support and technical back up of Autoclima products. Developing and growing business through service networks is beneficial to both industry and customers; with partners benefiting from additional revenue streams supported by a trusted and reputable business, and customers gaining assurance on the level of service from an approved Fischer Panda partner.

New partner, David Kingham, Operations Director of AES Auto Electrical Service in Leighton Buzzard commented; “Becoming a service partner has allowed AES to expand our portfolio with excellent backup from Fischer Panda UK and Autoclima products for all our customers. Fischer Panda is passionate about the venture with Autoclima and have a very friendly and professional outlook moving forward with all the service partners flying the Fischer Panda banner. We’re looking forward to the service partner announcement at the Show and being part of the group moving forward.”

Philip Leamon, Sales & Marketing Director of CCL Vehvac in Kent also shared his views on being part of the network; “We were looking for additional profitable work and this is now developing well through Fischer Panda UK’s partner support and commitment to development in the market. We have always found the Fischer Panda UK team to be enthusiastic about what they do and we’re looking forward to catching up with them at the Show.”

Sales and Marketing Director, Chris Fower, said: “Following on from signing an exclusivity agreement with Autoclima at last year’s Commercial Vehicle Show, we wanted to maximise on this partnership and move forward. The announcement of the service partner network at this year’s show, displays our commitment to providing customers with a comprehensive service in both supply and install solutions as well as aftersales support and technical back up provided by our trusted partner network.”

As providers of green efficient, integrated power and HVAC system solutions to the automotive and specialist vehicle sector, Fischer Panda UK can support simple spot cooling for problem areas and provide ways to accurately control the whole on-board environment, with system design to suit any vehicle application, added with top-class servicing and aftercare.

About Fischer Panda UK

Fischer Panda UK Ltd offers full-system design capability, servicing and aftercare as a leading distributor of diesel generators, air-conditioning systems, hybrid electric solutions and integrated mobile power solutions for a variety of commercial and specialist application vehicles.

Renowned worldwide as innovative, reliable and extremely quiet, the extensive Fischer Panda range of compact diesel generators includes its next

generation highly efficient and powerful variable speed iSeries-Generators. Other world-class products from Fischer Panda UK include mobile power solutions working as the sole UK automotive distributor for Mastervolt and a wide range of refrigeration and air conditioning solutions as the UK exclusive distributor for Autoclima.

Fischer Panda UK was among the first companies to achieve ISO UKAS 9000:2015 accreditation and operates from a purpose built 9,000 sq. ft facility in Verwood, Dorset.

Active in the military and automotive sectors, the company works with UK MOD and other military units around the world providing solutions for specialist vehicle and land-based applications. Two thirds of Formula 1 mobile truck units install Fischer Panda generators, as do the BBC, Sky and many other mobile broadcasting vehicles.

Operating since 1977, Fischer Panda GmbH is headquartered in Paderborn, Germany. The Fischer Panda team covers more than 500 technicians and partners in over 90 countries worldwide.
