

Fischer Panda UK is at The South Coast Boat Show at Ocean Village Marina this weekend

May 05, 2021 09:00 BST

## Fischer Panda UK at South Coast Boat Show with Quick System Supply and Installation to Get Boaters Out on the Water

*The South Coast Boat Show, 7<sup>th</sup> to 9<sup>th</sup> May, Ocean Village Marina, Southampton, Stand 9*

For boat owners needing urgent equipment so they can maximise time

onboard this season, Fischer Panda UK is offering fast supply and installation of its reliable solutions for visitors to this year's South Coast Boat Show at MDL Ocean Village Marina in Southampton.

The complete systems specialist has a large stock of its world-renowned generators, water-makers, air conditioning, electric propulsion equipment and integrated mobile power systems to meet extra demand with high numbers of boaters looking forward to enjoying home waters in the spring and summer of 2021.

At the third South Coast Boat Show, held over the weekend from 7<sup>th</sup> to 9<sup>th</sup> May, [Fischer Panda UK](#) experts will be on hand to discuss equipment refits and upgrades on Stand 9, where the Dorset-based company will also showcase some of its products.

Chris Fower, Sales and Marketing Director, Fischer Panda UK, said: "As the weather warms up, both new and established boaters are anticipating a long season out on the water, particularly with the uncertainty about foreign travel. We are therefore geared up to help them to quickly refit equipment or fit high-quality systems on a new boat, so there is no delay before they can launch. Our speciality is to offer the latest technology and most reliable equipment, while also focusing on customised projects where we can specify the best systems and then provide a quick turnaround and efficient installation. We invite everyone to stop by the stand to discuss the right Fischer Panda generator, Parker water-maker, Dometic HVAC, electric motor or Mastervolt and Czone power monitoring and control for their boat, so they can concentrate on enjoying themselves."

Fischer Panda's line of NMEA-certified and Lloyd's Register Type Approved diesel gensets, which are suitable for vessels ranging from RIBs to superyachts, are the quietest and most compact marine generators available. Its variable speed iSeries 'Perfect Power' range incorporates next generation technology that improves fuel efficiency and benefits the environment. Fischer Panda UK also offers electric and hybrid systems for newly built vessels or retro-fitting, ranging from 2 kW to 100 kW. A variety of water-makers, from reverse-osmosis desalination specialist Parker Group, incorporating Sea Recovery, Village Marine and HRO models, are also available.

With the chance to see over 80 new boats on display in the on-water section

of the exhibition, visitors to the South Coast Boat Show must book an appointment for entry via the [website](#). See Fischer Panda UK on Stand 9 in the land exhibition to discuss your equipment needs.

**About Fischer Panda UK**

Fischer Panda UK Ltd offers full-system design capability, servicing and aftercare as a leading distributor of diesel generators and a major supplier of the latest technology in air-conditioning systems, hybrid electric propulsion

systems, integrated mobile power solutions and watermakers for a variety of commercial and leisure vessels.

Renowned worldwide as innovative, reliable and extremely quiet, the extensive Fischer Panda range of compact diesel generators includes its next generation highly efficient and powerful variable speed iSeries-Generators. Fischer Panda generators from the Panda 4000s Neo up to the next generation iSeries Panda 45i genset have passed type approval by members of the IACS (International Association of Classification Societies) board.

Other world-class products from Fischer Panda UK include desalination systems from Sea Recovery, HRO, and Village Marine, with models suitable for day-boats to warships and offshore platforms, plus air-conditioning systems from leading marine HVAC supplier Dometic, CZone digital switching and Mastervolt power solutions.

Fischer Panda UK is ISO UKAS 9000/1 accredited and operates from a purpose built 9,000 sq. ft facility in Verwood, Dorset. Its experienced engineers, sales and operational staff work with OEMs to develop integrated systems for custom vessels and offer specialist technical support and on-going aftercare to its customers.

Also active in the military and automotive sectors, the company works with UK MOD and other armies around the world providing solutions for specialist vehicle and land-based applications. Two thirds of Formula 1 mobile truck units install Fischer Panda generators, as do the BBC, Sky and many other mobile broadcasting vehicles.

Operating since 1977, Fischer Panda GmbH is headquartered in Paderborn, Germany. The Fischer Panda team covers more than 500 technicians and partners in over 90 countries worldwide.
