Fischer Panda UK: Fischer Panda Named Distributor for CZone in UK

UK generator specialist will demonstrate strengthened on-board power monitoring and control offering with Mastervolt and CZone at London Boat Show (Stand LC028)

Significantly strengthening its on-board power monitoring and control capabilities, Fischer Panda UK has been named a distributor for digital switching specialist CZone in the country.

The new partnership will position diesel generator expert Fischer Panda as the prime supplier for marine and mobile power solutions at next year's London Boat Show where it will be able to offer visitors the full system integration package incorporating both Mastervolt and CZone products.

CZone digital switching enables boat owners to simplify their boat's electrical system by managing on-board equipment, such as generators, watermakers and HVAC, and changing the environment via a single touch-screen display or wireless device.

As a leading supplier of its renowned quiet-running gen-sets, as well as HRO/Village Marine and Sea Recovery watermakers and Dometic air-conditioning, Fischer Panda UK can now offer its compatible Mastervolt power solutions and CZone control and monitoring functionality for customised system integration around a Fischer Panda generator purchase. This integrated system approach applies across all three of Fischer Panda UK's core markets - Marine, Specialist Vehicle and Military.

Chris Fower, Marine Sales and Marketing Manager, Fischer Panda, said: "We are really pleased to be able to offer the leading CZone solutions which mean that we can help make it easier than ever before for boat owners to maintain oversight of their vessel's systems. Not only does CZone allow boaters to benefit from system-wide integration of onboard systems, but it will also resolve and potentially prevent future issues.

"We will be able to demonstrate our integrated system package to visitors at the 2018 London Boat Show, running working displays and really allowing people to experience the benefits and test the functionality of both the Mastervolt and CZone solutions for monitoring and controlling a generator or operating a watermaker, for instance."

Partnering with Mastervolt, CZone offers the most comprehensive power monitoring and control with any digital switching alternative. The CZone digital control and monitoring network simplifies installation of electrical systems through the replacement of complicated, cumbersome wiring to switch and fuse panels, with state-of-the-art, robust interfaces and light NMEA 2000 network cable. Fixed control through digital push button switches and intuitive touch screen displays removes unnecessary panels of individual switches.

CZone's new Combination Output Interface (COI) is a complete system that combines 5 CZone modules into a single module, for faster installation and smaller footprint, making it ideal for smaller vessels.

Andy Parker, Technical Sales Manager at Power Products Mobile Solutions UK, said: "We are delighted to strengthen the cooperation with Fischer Panda in the UK. The CZone product ties in perfectly with the current systems offered from Power Products and Fischer Panda empowering the perfect systems solution."

Fischer Panda customises engineered Mastervolt power solutions for boat owners with or without generators, including a one-off inverter or battery charger, or a fully integrated system. With a power range from 300W to 40kW, the choice ranges from the latest Lithium-Ion technology to Gel and AGM lead acid service batteries. In addition, as distributor for Bellmarine electric drive systems, Fischer Panda can also offer compatible Mastervolt solutions for complete and fully-integrated electric propulsion systems.

CZone is part of Power Products LLC, which includes Ancor, BEP, Blue Sea Systems, Lenco Marine, Marinco, Mastervolt and ProMariner which have provided innovative electrical solutions as independent companies for decades.

To see Fischer Panda UK's CZone and Mastervolt marine power solutions, visit Stand LC028 at next year's London Boat Show at ExCeL London from 10th to 14th January.

About Fischer Panda UK

Fischer Panda UK Ltd offers full-system design capability, servicing and aftercare as a leading distributor of diesel generators and a major supplier of the latest technology in air-conditioning systems, hybrid electric propulsion systems, integrated mobile power solutions and watermakers for a variety of commercial and leisure vessels.

Renowned worldwide as innovative, reliable and extremely quiet, the extensive Fischer Panda range of compact diesel generators includes its next generation highly efficient and powerful variable speed iSeries-Generators. Other world-class products from Fischer Panda UK include desalination systems from Sea Recovery, HRO, and Village Marine, with models suitable for day-boats to warships and offshore platforms, plus air-conditioning systems from leading marine HVAC supplier Dometic.

Fischer Panda UK is ISO UKAS 9000/1 accredited and operates from a purpose built 9,000 sq. ft facility in Verwood, Dorset. Its experienced engineers, sales and operational staff work with OEMs to develop integrated systems for custom vessels and offer specialist technical support and on-going aftercare to its customers.

Also active in the military and automotive sectors, the company works with UK MOD and other armies around the world providing solutions for specialist vehicle and land-based applications. Two thirds of Formula 1 mobile truck

units install Fischer Panda generators, as do the BBC, Sky and many other mobile broadcasting vehicles.

Operating since 1977, Fischer Panda GmbH is headquartered in Paderborn, Germany. The Fischer Panda team covers more than 500 technicians and partners in over 90 countries worldwide and this year is celebrating its 40th anniversary.
