Fischer Panda UK: Fischer Panda UK Adds New Sea Recovery Aqua Matic Dual Pass System to its Range of Watermakers

Compact reverse osmosis unit by Parker Hannifin Corporation produces ultra-pure water on-board

Fischer Panda UK has added the newly-launched Sea Recovery Aqua Matic Dual Pass series of watermakers to its product line.

For endless ultra-pure water and clean potable water on-board, the next generation reverse osmosis watermaker provides a fully automatic dual pass water desalination system as a single, compact unit.

The quiet-running and compact Aqua Matic Dual Pass is ideal for leisure boats, combining the benefits of a standard watermaker with the capability to produce ultra-pure water from sea water or from any dockside freshwater source.

Developed by the Water Purification Division of global leaders Parker Hannifin Corporation, the latest addition to the Aqua Matic range features the highest capacity to footprint/weight ratio and can produce up to 3400 gallons per day from sea water.

It features a titanium high pressure pump for extended use with ocean water and a remote-mounted 8-inch colour touch screen with real-time water quality monitor.

Easy to install and operate, the self-contained, plug-and-play Aqua Matic Dual Pass is available now from Fischer Panda UK and supported by Parker's global network of over 300 dealers and distributors.

Chris Fower, Fischer Panda, said: "We are really pleased to further enhance our watermaker offering to our customers and extend our range of popular Sea Recovery Aqua Matic systems. The new Dual Pass is one of the most revolutionary units available and particularly significant for boat owners who want reliable, limitless access to ultra pure water so they can eliminate streaks and spots, and minimise damage to yacht finishes, when they are washing their boat."

The Aqua Matic Dual Pass adds to Fischer Panda UK's Sea Recovery portfolio, which includes the high-capacity, fully-automated Sea Recovery Aqua Matic XL for super and mega yachts and the middle capacity Sea Recovery Aqua Whisper models. Featuring the latest technology, the Aqua Matic range is engineered to be easier to use and more reliable than conventional watermakers.

The Aqua Matic Dual Pass is available in three capacities, with prices starting from approximately £20,000.

About Fischer Panda UK

Fischer Panda UK Ltd offers full-system design capability, servicing and aftercare as a leading distributor of diesel generators and a major supplier of the latest technology in air-conditioning systems, hybrid electric propulsion systems, integrated mobile power solutions and watermakers for a variety of

commercial and leisure vessels.

Renowned worldwide as innovative, reliable and extremely quiet, the extensive Fischer Panda range of compact diesel generators includes its next generation highly efficient and powerful variable speed iSeries-Generators. Other world-class products from Fischer Panda UK include desalination systems from Sea Recovery, HRO, and Village Marine, with models suitable for day-boats to warships and offshore platforms, plus air-conditioning systems from leading marine HVAC supplier Dometic.

Fischer Panda UK is ISO UKAS 9000/1 accredited and operates from a purpose built 9,000 sq. ft facility in Verwood, Dorset. Its experienced engineers, sales and operational staff work with OEMs to develop integrated systems for custom vessels and offer specialist technical support and on-going aftercare to its customers.

Also active in the military and automotive sectors, the company works with UK MOD and other armies around the world providing solutions for specialist vehicle and land-based applications. Two thirds of Formula 1 mobile truck units install Fischer Panda generators, as do the BBC, Sky and many other mobile broadcasting vehicles.

Operating since 1977, Fischer Panda GmbH is headquartered in Paderborn, Germany. The Fischer Panda team covers more than 500 technicians and partners in over 90 countries worldwide and this year is celebrating its 40th anniversary.
