Fischer Panda UK Introduce Latest Portable Power Solutions to the Marine Inland Market at the Crick Boat Show

Crick Boat Show, 25 – 27 May, Crick Marina, Northants, Stand Q36

Leading marine power solutions specialist Fischer Panda UK announce their return to the Crick Boat Show this year, exhibiting from their full demonstration trailer located at the central location of stand Q36. Fischer Panda UK is showcasing its full range of systems and products for inland

waterways craft with a strengthened presence at this year's Crick Boat Show with the new addition of Clayton Power's advanced LPS II range added to their product line-up.

Show visitors can explore first-hand Clayton Power's All-in-One Lithium Power Supply units at Fischer Panda UK's stand, which offer an efficient and powerful mobile solution for marine applications requiring small to medium levels of onboard portable power. With the ability to be charged from the boat's alternator and renewable sources while out on the water to power onboard equipment, Clayton Power's LPS II units also prioritise environmental sustainability and user convenience, offering a hassle-free power source for users on the go.

Also on display will be the Panda 4000s Neo and the Panda 5000i Neo, which are leading additions to power solution expert Fischer Panda's range of compact diesel generators. Perfectly suited for owners of smaller vessels and canal boats with limited space who are looking for independence away from marinas or shore power, visitors will be able to see first-hand the advantages of Fischer Panda's Neo Panda generators and their suitability for cruising or liveaboard vessels. Fischer Panda UK's longstanding brand partner Mastervolt will also have a presence on the stand this year, showcasing power electronics solutions designed to meet the on-board energy requirements of the marine inland market.

Fischer Panda UK will also exhibit their advanced range of climate control solutions, featuring multipurpose, roof mounted air conditioning units from partner brands Autoclima and Dometic. Even faced with the most extreme temperatures, Fischer Panda UK can provide either simple, spot cooling for problem areas or accurately control the whole on-board environment. Dometic's self-contained reverse cycle air conditioners are ideal for boats up to approximately 75ft and can be conveniently concealed under a bunk or seat, making these versatile units ideal for inland vessels.

Chris Fower, Sales and Marketing Manager at Fischer Panda UK, comments: "Crick Boat Show is always a crucial show in our calendar and offers an unmissable opportunity to engage with both boat owners and visitors alike to demonstrate the advantages of our power solutions, which are perfect for canal and waterways vessels accredited to their benefits of efficiency and sustainability. We are excited to introduce Clayton Power's LPS II range to the inland marine market at this year's show, the newest addition to our

extensive power solutions portfolio. To commemorate this occasion, we will be holding a raffle prize competition for visitors to enter on the day and win a drink on Panda, a nice selection of locally sourced Dorset beer and cider will be kept refreshingly chilled, powered by the Clayton LPS II unit and recharged by renewable solar energy.”

Specialist representatives from the Verwood-based company will be on hand to discuss and advise boat owners on the most suitable and cost-effective power solution options for their canal and waterways vessels as demand increases for power and propulsion solutions that are reliable, quiet and proficient.

About Fischer Panda UK

Fischer Panda UK Ltd offers full-system design capability, servicing and aftercare as a leading distributor of diesel generators, air-conditioning systems, hybrid electric solutions and integrated mobile power solutions for a variety of commercial and specialist application vehicles.

Renowned worldwide as innovative, reliable and extremely quiet, the extensive Fischer Panda range of compact diesel generators includes its next generation highly efficient and powerful variable speed iSeries-Generators. Other world-class products from Fischer Panda UK include mobile power solutions from Clayton Power and working as the sole UK automotive distributor for Mastervolt and a wide range of refrigeration and air conditioning solutions as the UK exclusive distributor for Autoclima.

Fischer Panda UK was among the first companies to achieve ISO UKAS 9000:2015 accreditation and operates from a purpose built 9,000 sq. ft facility in Verwood, Dorset.

Active in the military and automotive sectors, the company works with UK MOD and other military units around the world providing solutions for specialist vehicle and land-based applications. Two thirds of Formula 1 mobile truck units install Fischer Panda generators, as do the BBC, Sky and many other mobile broadcasting vehicles. Operating since 1977, Fischer Panda GmbH is headquartered in Paderborn, Germany. The Fischer Panda team covers more than 500 technicians and partners in over 90 countries worldwide.
