

Leading blue light sector systems integrator, Fischer Panda UK, is delighted to introduce its range of heating systems from Autoterm - offering complete temperature control systems for emergency service vehicles and the professional mobile market. Fischer Panda will be displaying a range of diesel-powered air and liquid heaters at the Show amongst their comprehensive range of climate control solutions.

These easy-to-fit heating systems feature built in control options, providing exceptional heating capabilities and ensuring optimal comfort and warmth even in the harshest environments. With advanced technology and precise temperature control, these heaters deliver efficient and reliable performance.

Manufactured in Europe with ISO 9001-2015 & ISO 14001-2015 certification, Autoterm heaters have been well established for many years, offering a strong support network throughout the UK and Europe.

These innovative diesel-powered heaters are ideal for vehicles of all kinds, from vans to lorries and have capabilities which ensure a heating source, even when the main vehicle engine is off. Equipped with a brushless induction motor to ensure longevity, Autoterm's diesel heaters achieve reliable operations in extreme temperature conditions as low as -45 degrees.

Coming into the Winter season, Autoterm's heating systems can be easily and conveniently installed or retrofitted. The installation kits supplied with each heater readily contain all items needed to fit the system faultlessly and safely. Fischer Panda offers complete system design, installation and servicing support for a wide range of applications.

Commenting on the efficiency of the product, Chris Fower, Sales and Marketing Director of Fischer Panda UK said; *"Not only are Autoterm's heaters well established and reliable, they are competitively priced and offer an extensive range of systems to choose from, with a wide variety of control options.*

"With our commitment to innovation, reliability, and customer satisfaction with our integrated systems approach for the emergency vehicle sector, we believe that Autoterm's heating systems will provide exceptional heating performance and energy efficiency across a multitude of applications."

Offering complete system solutions, Fischer Panda UK will soon integrate

these heating systems alongside their range of air conditioning units from Autoclima, to offer a comprehensive onboard climate control system.

Compatible with all mobile applications with options of 2kW, 4kW, 6kW & 8kW in the air heater range and 5kW, 14.5kW & 30kW in the liquid or water heater range, the full range of options and control panels are now available online: www.autoterm.com

About Fischer Panda UK

Fischer Panda UK Ltd offers full-system design capability, servicing and aftercare as a leading distributor of diesel generators, air-conditioning systems, hybrid electric solutions and integrated mobile power solutions for a variety of commercial and specialist application vehicles.

Renowned worldwide as innovative, reliable and extremely quiet, the extensive Fischer Panda range of compact diesel generators includes its next generation highly efficient and powerful variable speed iSeries-Generators. Other world-class products from Fischer Panda UK include mobile power solutions working as the exclusive UK automotive distributor for Mastervolt and a wide range of refrigeration and air-conditioning solutions as the UK exclusive distributor for Autoclima.

Fischer Panda UK was among the first companies to achieve ISO UKAS 9000:2015 accreditation and operates from a purpose built 9,000 sq. ft facility in Verwood, Dorset.

Active in the military and automotive sectors, the company works with UK MOD and other military units around the world providing solutions for specialist vehicle and land-based applications. Two thirds of Formula 1 mobile truck units install Fischer Panda generators, as do the BBC, Sky and many other mobile broadcasting vehicles.

Operating since 1977, Fischer Panda GmbH is headquartered in Paderborn, Germany. The Fischer Panda team covers more than 500 technicians and partners in over 90 countries worldwide.
