Fischer Panda UK Launches New E-Store

Fischer Panda UK has introduced a new e-store to expedite and simplify the purchase of approved service kits, spares and accessories for customers and partners.

Available now through the Fischer Panda UK website, the [e-store](#) offers fast delivery of a range of products from a full stock of genuine manufacturer parts made for the Verwood company's marine generator and watermaker systems, as well as the latest line-up of Mastervolt power electronics.

The complete marine systems specialist launched the Fischer Panda UK E-Store to provide an efficient and convenient process for product selection, payment and delivery for those customers who need to replace specific parts in an existing system.

For general enquiries about the company's integrated systems, questions about customised applications, to obtain a quote or for help finding the right product, the Fischer Panda UK specialist team remains on hand for more in-depth individual discussions.

Chris Fower, Sales and Marketing Director, Fischer Panda UK, said: "Driven by customer feedback, we added the Fischer Panda UK E-Store to our revamped website to enable people to find and buy the product they need in just a few clicks for next day delivery. It is a smoother, easier process for customers who have one of our generator or watermaker systems to cost a service kit or renew a component that is broken, old or past warranty. We remain committed to offering customised solutions for different applications. When individual discussions with customers are needed, our team of experts are readily available to provide advice about system integration of our marine generators, electric propulsion, air-conditioning, watermakers, and power monitoring and control solutions. If customers have any questions or would like a quote, we encourage them to call our office."

The Fischer Panda UK E-Store includes a full list of consumables and products under separate sections for generators, watermakers and Mastervolt accessories. There are various service kit options available to cover routine maintenance tasks for different generator and watermaker models, as well as approved spares such as air filter pads, blade fuses, element prefilters and so on. Fischer Panda UK's Mastervolt product range includes battery and solar chargers, inverters, inverter/chargers, DC to DC converters, battery isolators, battery technologies, connection solutions and digital monitoring and control, as well as fully integrated systems.

About Fischer Panda UK

Fischer Panda UK Ltd offers full-system design capability, servicing and aftercare as a leading distributor of diesel generators and a major supplier of the latest technology in air-conditioning systems, hybrid electric propulsion systems, integrated mobile power solutions and watermakers for a variety of commercial and leisure vessels.

Renowned worldwide as innovative, reliable and extremely quiet, the extensive Fischer Panda range of compact diesel generators includes its next generation highly efficient and powerful variable speed iSeries-Generators. Fischer Panda generators from the Panda 4000s Neo up to the next generation iSeries Panda 45i genset have passed type approval by members of the IACS (International Association of Classification Societies) board.

Other world-class products from Fischer Panda UK include desalination systems from Sea Recovery, HRO, and Village Marine, with models suitable for day-boats to warships and offshore platforms, plus air-conditioning systems from leading marine HVAC supplier Dometic, CZone digital switching and Mastervolt power solutions.

Fischer Panda UK is ISO UKAS 9000/1 accredited and operates from a purpose built 9,000 sq. ft facility in Verwood, Dorset. Its experienced engineers, sales and operational staff work with OEMs to develop integrated systems for custom vessels and offer specialist technical support and on-going aftercare to its customers.

Also active in the military and automotive sectors, the company works with UK MOD and other armies around the world providing solutions for specialist vehicle and land-based applications. Two thirds of Formula 1 mobile truck units install Fischer Panda generators, as do the BBC, Sky and many other mobile broadcasting vehicles.

Operating since 1977, Fischer Panda GmbH is headquartered in Paderborn, Germany. The Fischer Panda team covers more than 500 technicians and partners in over 90 countries worldwide.
