

GREENFLEET AWARDS 2022

RECOGNISING CLEAN FLEET INNOVATION

Dec 06, 2022 13:00 GMT

Fischer Panda UK Nominated for GREENFLEET Award for Industry Innovation

Fischer Panda UK, a leading provider of sustainable mobile power solutions for commercial and specialist vehicles, has revealed that it has been nominated for the GREENFLEET Award for Industry Innovation. The prestigious annual GREENFLEET Awards will take place at the British Motor Museum in Warwickshire on Thursday 8th December.

GREENFLEET's annual Awards is one of the most highly anticipated dates in the fleet sector calendar. Attended by high-ranking individuals from vehicle

manufacturers to industry suppliers and complimented by the most forward-thinking fleet managers in the UK, the awards celebrate and recognise clean fleet innovation in more than 20 separate categories.

The GREENFLEET Award for Industry Innovation is presented to the organisation that has introduced a new technology, practice or method that reduces fuel consumption and emissions and demonstrates innovation in its design and/or implementation.

Fischer Panda UK was nominated in this particular category for their work with the leading news broadcaster Sky. By designing and installing hybrid mobile power systems onboard Sky's Rapid News Gatherer vehicles, Fischer Panda UK assisted the news broadcaster in the reduction of carbon emissions and supported Sky News in winning the Broadcast Tech Innovation Award.

“We are delighted to have been shortlisted for GREENFLEET's Award for Industry Innovation in recognition of our collaboration with Sky for their sustainable Ranger vehicle project,” said Chris Fower, Sales & Marketing Director for Fischer Panda UK. “It was an honour to have worked alongside Sky's vehicle technology team to create a hybrid system for their fleet of Ranger vehicles, enabling them to be used for core functions, such as news reporting, with the engine turned off.”

Working with Fischer Panda UK contributed to Sky News winning The Broadcast Tech Innovation Award for its sustainable vehicle project. The aim of the project was to get the vehicles on the road to green transition and to reduce CO2 output when in operational service.

Fischer Panda UK offers full-system design capability, servicing and aftercare as a leading distributor of generators, air-conditioning systems, hybrid electric solutions and integrated mobile power solutions for a variety of commercial vehicles.

About Fischer Panda UK

Fischer Panda UK Ltd offers full-system design capability, servicing and aftercare as a leading distributor of diesel generators, air-conditioning systems, hybrid electric solutions and integrated mobile power solutions for a variety of commercial and specialist application vehicles.

Renowned worldwide as innovative, reliable and extremely quiet, the extensive Fischer Panda range of compact diesel generators includes its next-generation highly efficient and powerful variable speed iSeries-Generators. Other world-class products from Fischer Panda UK include mobile power solutions working as the sole UK automotive distributor for Mastervolt and a wide range of refrigeration and air conditioning solutions as the UK exclusive distributor for Autoclima.

Fischer Panda UK was among the first companies to achieve ISO UKAS 9000:2015 accreditation and operates from a purpose-built 9,000 sq. ft facility in Verwood, Dorset.

Active in the military and automotive sectors, the company works with UK MOD and other military units around the world providing solutions for specialist vehicle and land-based applications. Two-thirds of Formula 1 mobile truck units install Fischer Panda generators, as do the BBC, Sky and many other mobile broadcasting vehicles.

Operating since 1977, Fischer Panda GmbH is headquartered in Paderborn,

Germany. The Fischer Panda team covers more than 500 technicians and partners in over 90 countries worldwide.
