

The Fischer Panda UK team at Crick Boat Show

May 30, 2019 11:08 BST

## Fischer Panda UK Reports Most Successful Crick Boat Show Yet as Power of Electric Pulls Visitors to New Demo Trailer

Complete systems specialist Fischer Panda UK say the rise in interest in electric propulsion in the inland waterways sector helped drive a record number of visitors to its new demo trailer at this year's Crick Boat Show.

With more boat owners looking for alternatives to traditional petrol or diesel

drive systems, Fischer Panda's comprehensive range of battery, parallel hybrid and generator supported electric propulsion systems combined with its full-system capabilities and service support attracted more enquiries than ever before over the Bank Holiday weekend.

In addition, visitors were also able to view a Fischer Panda UK-supplied system onboard an Elton Moss boat at the show, with installed equipment including a Bellmarine 20kW motor with a parallel function working alongside an existing engine, Fischer Panda AGT 13000 DC 48v generator and Dometic reverse cycle air conditioning system

Chris Fower, Sales and Marketing Director, Fischer Panda UK, said: "We brought our upgraded display trailer to the show for the first time and the feedback from customers was fantastic. It made a real difference for people to be able to experience the sound, operation and functionality of the products and equipment in this setting. Everyone that came onboard was impressed with the system approach offered by Fischer Panda UK and said we really simplified what can seem to be a confusing subject at first.

"Crick Boat Show is always a key event for us, so we are delighted that it was our most successful in terms of visitors and enquiries. We have several follow up meetings with boatbuilders and customers in the pipeline to discuss new opportunities around our electric propulsion capabilities."

Marking its 25<sup>th</sup> anniversary year, Fischer Panda UK enjoyed its most high-profile presence yet at the annual May event, highlighting its marine generators, electric propulsion and integrated systems.

The Fischer Panda UK trailer will also be at this year's Southampton Boat Show on Stand E020. Visit [www.fischerpanda.co.uk](http://www.fischerpanda.co.uk) for more information.

### **About Fischer Panda UK**

Celebrating its 25<sup>th</sup> anniversary year, Fischer Panda UK Ltd offers full-system design capability, servicing and aftercare as a leading distributor of diesel generators and a major supplier of the latest technology in air-conditioning systems, hybrid electric propulsion systems, integrated mobile power solutions and watermakers for a variety of commercial and leisure vessels.

Renowned worldwide as innovative, reliable and extremely quiet, the extensive Fischer Panda range of compact diesel generators includes its next generation highly efficient and powerful variable speed iSeries-Generators. Fischer Panda generators from the Panda 4000s Neo up to the next generation iSeries Panda 45i genset have passed type approval by members of the IACS (International Association of Classification Societies) board.

Other world-class products from Fischer Panda UK include desalination systems from Sea Recovery, HRO, and Village Marine, with models suitable for day-boats to warships and offshore platforms, plus air-conditioning

systems from leading marine HVAC supplier Dometic, CZone digital switching and Mastervolt power solutions.

Fischer Panda UK is ISO UKAS 9000/1 accredited and operates from a purpose built 9,000 sq. ft facility in Verwood, Dorset. Its experienced engineers, sales and operational staff work with OEMs to develop integrated systems for custom vessels and offer specialist technical support and on-going aftercare to its customers.

Also active in the military and automotive sectors, the company works with UK MOD and other armies around the world providing solutions for specialist vehicle and land-based applications. Two thirds of Formula 1 mobile truck units install Fischer Panda generators, as do the BBC, Sky and many other mobile broadcasting vehicles.

Operating since 1977, Fischer Panda GmbH is headquartered in Paderborn, Germany. The Fischer Panda team covers more than 500 technicians and partners in over 90 countries worldwide.
