

Fischer Panda UK's stand at Commercial Vehicle Show 2021

Mar 29, 2022 09:00 BST

## Fischer Panda UK Reveals Expanded Product Range and New Projects with Strengthened Presence at Commercial Vehicle Show

*Commercial Vehicle Show 2022, 24<sup>th</sup> to 26<sup>th</sup> May, NEC, Birmingham, Stand 5E92*

Hybrid power solutions provider Fischer Panda UK will demonstrate extended capabilities as an industry-leading integrated systems partner when it reveals new business growth and projects at this year's Commercial Vehicle Show.

With its most high-profile presence at the show in 15 years of attendance, Fischer Panda UK will announce an additional brand to significantly strengthen its range of equipment and systems and will also showcase vehicles on the expanded stand to represent the scope of its complete installations to visitors.

The latest developments are part of the company's ambitious plans to remain at the forefront of the latest innovations in customised hybrid and electric power solutions across the vehicle and military sectors, offering key benefits to customers, operators and vehicle builders. Fischer Panda UK is also expanding its sales team to support the growth, recently appointing a new Vehicle and Specialist Applications Sales Manager, Ian Saunders, with further additions to follow.

Equipment on display at the Commercial Vehicle Show will include the advanced variable speed Fischer Panda diesel generators, Mastervolt power electronics, Blue Sea Systems and air conditioning equipment. As technical specialist integrators, Fischer Panda UK offers supply, installation and service of complete customised solutions, including hybrid electric and mobile power systems, with or without generators, for commercial and specialist application vehicles.

Recent new Fischer Panda UK projects include the supply and installation of a full Mastervolt power system to EMS Group for its fleet of Mobile Healthcare units.

Chris Fower, Fischer Panda UK's Sales and Marketing Director, said: "The Commercial Vehicle Show is a key event for us every year, but it has greater significance for us in 2022 as we enter a new growth phase in our automotive business. With the platform of a larger stand display and team at the NEC, we are excited to showcase our expanded capabilities and demonstrate the benefits we can offer to specialist vehicle operators, managers and business owners. Our strength is in developing and customising innovative and cost-effective solutions. We are specifically seeing a growing need for hybrid and electric systems as operators aim to reduce emissions in the future. We look forward to seeing partners and new customers during the three days."

Fischer Panda UK is based at a 9,000 sq. feet facility in Verwood, Dorset, with almost 30 years' experience across the vehicle, military and marine sectors.

Across the three days of the CV Show, members of the team will be on-hand to discuss the company's equipment and systems. Visitors will be able to view the full product range and vehicle applications, including an Emergency Medical Service (EMS) vehicle and demos. A special drinks reception will be held on Stand 5E92 on Wednesday 25<sup>th</sup> May from 3.30pm.

## About Fischer Panda UK

Fischer Panda UK Ltd offers full-system design capability, servicing and aftercare as a leading distributor of diesel generators, air-conditioning systems, hybrid electric solutions and integrated mobile power solutions for a variety of commercial and specialist application vehicles.

Renowned worldwide as innovative, reliable and extremely quiet, the extensive Fischer Panda range of compact diesel generators includes its next generation highly efficient and powerful variable speed iSeries-Generators. Other world-class products from Fischer Panda UK include mobile power solutions working as the exclusive UK automotive distributor for Mastervolt and a wide range of refrigeration and air-conditioning solutions as the UK exclusive distributor for Autoclima.

Fischer Panda UK was among the first companies to achieve ISO UKAS 9000:2015 accreditation and operates from a purpose built 9,000 sq. ft facility in Verwood, Dorset.

Active in the military and automotive sectors, the company works with UK MOD and other military units around the world providing solutions for specialist vehicle and land-based applications. Two thirds of Formula 1 mobile truck units install Fischer Panda generators, as do the BBC, Sky and many other mobile broadcasting vehicles.

Operating since 1977, Fischer Panda GmbH is headquartered in Paderborn, Germany. The Fischer Panda team covers more than 500 technicians and partners in over 90 countries worldwide.
