Fischer Panda UK - Seawork International: Fischer Panda UK Announces Type Approval for Generator Range

Seawork International, 3rd to 5th July, Southampton, Stand PG79

Leading marine system specialist Fischer Panda UK has announced at Seawork that its range of generators from the new Panda 4000s Neo up to the next generation iSeries Panda 45i genset have successfully passed type

approval by members of the IACS (International Association of Classification Societies) board.

In securing the certification, the generators are verified to have fulfilled all classification society requirements, affirming the high quality and reliability of Fischer Panda's renowned compact, sound-insulated diesel generators.

The IACS type approval includes certifications from globally-recognised organisations including Lloyd's Register, Bureau Veritas and DNV GL, as well as several country-specific bodies, providing a reliable way to demonstrate the quality of Fischer Panda's products and their components.

Chris Fower, Sales and Marketing Director, Fischer Panda UK, said: "We are very pleased to provide further confidence to our customers and partners that we supply reliable products that fulfil the highest quality standards. As part of our continued commitment to meet international standards and maintain high levels of performance and satisfaction, this new endorsement will be very valuable to us in assuring new customers and dealing with projects that require recognised approval, such as Lloyd's or DNV."

The full type approval classification achieved by Fischer Panda is as follows: Lloyd's Register, Bureau Veritas, Croatian Register of Shipping/ Austrian Veritas (Hrvatski Registar Brodova), Registro Italiano Navale, American Bureau of Shipping, DNV GL, Nippon Kaiji Kyokai (ClassNK), Russian Maritime Register of Shipping (Российский морской регистр судоходства), Polish Register of Shipping (Polski Rejestr Statków), China Classification Society, Korean Register of Shipping and Indian Register of Shipping.

The certification covers the new fixed-speed Panda 4000s Neo, as well as the Panda 5000i Neo, both using the in-house designed water-cooled FPE320 single cylinder diesel engine. The 45i iSeries genset represents one of the larger models in the expanding variable speed range.

The factory choice for boat builders, Fischer Panda generators are designed to be compact, quiet and powerful, meeting customer demand for low operating sound levels and vibrations. All the iSeries generators are fitted with the renowned Fischer Panda sound insulation and water cooling. Meeting emission standards is also a priority, which is why the generators feature modern, innovative and environmentally-friendly inverter technology.

Last year, Fischer Panda UK was among the first companies to achieve ISO 9001:2015 certification, an internationally-recognised standard for quality management systems.

Fischer Panda UK is a leading distributor of mobile, quiet diesel generators and offers the market's largest selection of marine generators from RIBs up to super yachts. It offers full-system design capability, servicing and aftercare as a major supplier of the latest technology in air-conditioning systems, hybrid electric propulsion systems, integrated mobile power solutions and watermakers for a variety of commercial and leisure vessels. Its experienced engineers, sales and operational staff work with OEMs to develop integrated systems for custom vessels and offer specialist technical support and on-going aftercare to its customers.

Dedicated to safe ships and clean seas, IACS makes a unique contribution to maritime safety and regulation through technical support, compliance verification and research and development. More than 90% of the world's cargo carrying tonnage is covered by the classification design, construction and through-life compliance rules and standards set by the twelve Member Societies of IACS.

About Fischer Panda UK

Fischer Panda UK Ltd offers full-system design capability, servicing and aftercare as a leading distributor of diesel generators and a major supplier of the latest technology in air-conditioning systems, hybrid electric propulsion systems, integrated mobile power solutions and watermakers for a variety of commercial and leisure vessels.

Renowned worldwide as innovative, reliable and extremely quiet, the extensive Fischer Panda range of compact diesel generators includes its next generation highly efficient and powerful variable speed iSeries-Generators. Other world-class products from Fischer Panda UK include desalination systems from Sea Recovery, HRO, and Village Marine, with models suitable for day-boats to warships and offshore platforms, plus air-conditioning systems from leading marine HVAC supplier Dometic.

Fischer Panda UK is ISO UKAS 9000/1 accredited and operates from a purpose built 9,000 sq. ft facility in Verwood, Dorset. Its experienced engineers, sales and operational staff work with OEMs to develop integrated systems for custom vessels and offer specialist technical support and on-going aftercare to its customers.
