Fischer Panda UK - Seawork International: Fischer Panda UK Highlights Commercial Watermakers Offering Alongside Established Range of Leading Diesel Generators

Seawork International, 3rd to 5th July, Southampton, Stand PG79

For the first time at Seawork International, Fischer Panda UK is emphasising

its capabilities in the commercial watermaker market, in addition to showcasing its leading marine diesel generators.

Fischer Panda UK is the exclusive UK distributor of Village Marine watermakers and supplies the rugged commercial standard systems, suitable for some of the most demanding applications throughout the world, including disaster relief, offshore, workboat, fishing vessels, tugs, military and light commercial vessels. At this year's Seawork, Fischer Panda is offering advice and information from its stand PG79 about the features that ensure the Village Marine reverse osmosis watermakers are renowned for their low maintenance requirements and sturdy and reliable performance.

The leading diesel generator supplier will also showcase its generators including the constant speed Compact Power 1500 rpm series and Perfect Power iSeries with variable speed technology, demonstrating how its engineers can customise the ideal combination of gensets for heavier commercial applications.

As part of Fischer Panda UK's comprehensive range of automatic and manual watermakers, the Parker Hannifin Corporation Village Marine line is developed for 24/7 consumption and high levels of user operation and includes the LTM, Stowaway, Pure Water (PW) and LT systems.

Ideal as a practical and easy-to-install solution for commercial fishing vessels with limited space and medium to high water demand, the Village Marine LTM series produce up to 1800 gallons of fresh water per day and are manually operated for durable and fail-safe performance on extended voyages. The modular design of the 5-model range from the LTM-500 to the LTM-1800 allows flexible installation options and is suitable for boats up to 100 feet in length.

The heavy-duty LT system range are high-capacity watermakers with a compact frame and small 40-inch deep footprint that are well-suited to workboats, commercial vessels, small ships and commercial fishing vessels. With a maximum production of up to 7000 gallons per day, the LT-300 to LT-7000 units feature easy, semi-automatic operation and are designed for continuous production on vessels up to 150 feet.

For superior performance and extended service life, the Village Marine PW system are another heavy-duty option suitable for workboats, patrol boats

and mega yachts. The semi-automatic PW has a maximum production of up to 2000 gallons and framed, semi-modular and modular configuration options for flexible installation options.

The Stowaway range serve as a mid-range solution for smaller workboats and trawlers with a production capacity of between 400 and 800 gallons per day. Single framed, simple to use and easy to install, the reliable unit is semi-automatic.

As suppliers of Dometic air-conditioning systems and hybrid electric propulsion systems, Fischer Panda UK provides the whole product package, servicing and aftercare to commercial customers.

About Fischer Panda UK

Fischer Panda UK Ltd offers full-system design capability, servicing and aftercare as a leading distributor of diesel generators and a major supplier of the latest technology in air-conditioning systems, hybrid electric propulsion systems, integrated mobile power solutions and watermakers for a variety of commercial and leisure vessels.

Renowned worldwide as innovative, reliable and extremely quiet, the extensive Fischer Panda range of compact diesel generators includes its next generation highly efficient and powerful variable speed iSeries-Generators. Other world-class products from Fischer Panda UK include desalination systems from Sea Recovery, HRO, and Village Marine, with models suitable for day-boats to warships and offshore platforms, plus air-conditioning systems from leading marine HVAC supplier Dometic.

Fischer Panda UK is ISO UKAS 9000/1 accredited and operates from a purpose built 9,000 sq. ft facility in Verwood, Dorset. Its experienced engineers, sales and operational staff work with OEMs to develop integrated systems for custom vessels and offer specialist technical support and on-going aftercare to its customers.
