Fischer Panda UK Shows Industry Scope with EMS Healthcare Self-Drive Vehicle at Commercial Vehicle Show 2022

Mobile power solutions specialist showcases EMS Healthcare mobile medical vehicle at Commercial Vehicle Show, stand 5E92, 2022, 24th to 26th May

Fischer Panda UK announces a significant 50-vehicle contract with EMS Healthcare at this year's CV Show. Demonstrating further expansion and expertise within the automotive and commercial vehicle market, leading hybrid power solutions provider Fischer Panda UK will feature an EMS

Healthcare vehicle on its stand, following its recent contract win.

Highlighting Fischer Panda's diversity within the sector, the 'Outreach Project' involved the supply and installation of hybrid mobile power applications on over 50 specialist vehicles, used for vital medical services within communities.

EMS Healthcare, which forms part of The EMS Group, owns, operates and manages one the UK's most extensive fleets of flexible mobile medical units and vehicles. The EMS Group has been supporting healthcare providers for over 20 years in the provision of cost effective mobile medical solutions.

Andy Morris, Business Development Manager at The EMS Group, said: "Outreach is the latest innovation from The EMS Group and our first self-drive vehicle. We have collaborated with Fischer Panda to integrate a solar powered battery system, an important step for us in our quest to become more sustainable.

"With the added ability to top-up the batteries using the vehicle engine, the technology allows for extended use without the need for regular downtime or mains connections. This eliminates the need for power from sites, so we can reach more locations than ever before. For clinical needs in particular, our clients need the ability to take services to the hard to reach, and this innovation can absolutely help do that."

He also said: "The Commercial Vehicle Show is a great opportunity for us to talk to people about their needs. We're excited to showcase how Outreach and the technology on-board can help provide solutions to a number of challenges.'

The system supplied on each of the EMS Healthcare's vehicles by Fischer Panda UK are:

- 1x Mastervolt Combi Master 12/3000-100 Inverter/Charger
- 2x Mastervolt Mac Plus 12/12-50 Smart Euro 5/6 engine Dc-Dc chargers
- 1x Mastervolt MLI Ultra 12/5500 Lithium Ion Battery
- Associated Mastervolt BMS (Battery Management System)
-

Sales Director for Fischer Panda UK, Chris Fower, said: “We have been Mastervolt’s UK Technical Partner for the automotive market since 2010 and we pride ourselves on offering more than just the supply of equipment. We’ve grown year-on-year while developing an award-winning technical team to support our customers including EMS Healthcare. We are only too pleased to have this opportunity to show what can be achieved through working in partnership and we welcome the chance to share our expertise to more people.”

As part of the supply plan Fischer Panda’s Engineering/Technical team will be offering commissioning and training to ensure optimum system performance and technical aftercare support to EMS Healthcare. Andy Morris will also be on-hand to answer any questions about The EMS Group’s innovations. A video outlining the project supported by Fischer Panda UK can be seen [here](#).

The Fischer Panda UK exhibition stand will display and demonstrate a range of products highlighting the company’s integrated system approach. About Fischer Panda UK

Fischer Panda UK Ltd offers full-system design capability, servicing and aftercare as a leading distributor of diesel generators, air-conditioning systems, hybrid electric solutions and integrated mobile power solutions for a variety of commercial and specialist application vehicles.

Renowned worldwide as innovative, reliable and extremely quiet, the extensive Fischer Panda range of compact diesel generators includes its next generation highly efficient and powerful variable speed iSeries-Generators. Other world-class products from Fischer Panda UK include mobile power solutions working as the exclusive UK automotive distributor for Mastervolt and a wide range of refrigeration and air-conditioning solutions as the UK exclusive distributor for Autoclima.

Fischer Panda UK was among the first companies to achieve ISO UKAS 9000:2015 accreditation and operates from a purpose built 9,000 sq. ft facility in Verwood, Dorset.

Active in the military and automotive sectors, the company works with UK MOD and other military units around the world providing solutions for specialist vehicle and land-based applications. Two thirds of Formula 1 mobile truck units install Fischer Panda generators, as do the BBC, Sky and many other mobile broadcasting vehicles. Operating since 1977, Fischer Panda GmbH is headquartered in Paderborn, Germany. The Fischer Panda team covers more than 500 technicians and partners in over 90 countries worldwide.
