

Fischer Panda UK will debut its upgraded display trailer at this year's Southampton Boat Show

Aug 07, 2018 11:54 BST

Fischer Panda UK: Upgraded Fischer Panda Display Trailer to Stage Live Complete System Demonstrations for Visitors at Southampton Boat Show

The YachtMarket.com Southampton Boat Show, 14th to 23rd September, Stand E020

Live equipment demonstrations every day at 11.30am

Fischer Panda UK will provide visitors with a first-hand, interactive experience of its complete system capability with the debut of its upgraded display trailer at this year's Southampton Boat Show.

The marine generator, electric propulsion, air-conditioning, watermaker, and power monitoring and control supplier is bringing its latest technology and equipment direct to boaters with live demonstrations and the chance to see, hear and operate the products for themselves.

A regular feature at the show since 2003, the Fischer Panda demo-trailer on Stand E020 has been refurbished and enhanced for 2018 to showcase the company's integrated system approach, which now encompasses CZone digital switching alongside its well-renowned quiet-running gen-sets, HRO/Village Marine and Sea Recovery watermakers, Dometic air-conditioning and Mastervolt solutions.

Simulating on-board operation of the equipment on the water, the enhanced interior will offer an easy way for visitors to engage and participate in testing the functionality of the individual products and to understand the benefits of maintaining oversight of vessel systems.

Fischer Panda experts will also be available to offer advice on product selection and installation, and to answer any specific questions from boaters.

Chris Fower, Sales and Marketing Director, Fischer Panda UK, said: "Our demo trailer provides visitors with a unique opportunity at the show to see the true functionality and features of the products while in operation. We always get a very positive response from people, so we decided to invest in an upgrade this year so that we can incorporate and integrate all our current and new product lines and technology.

"There will be air-conditioning and watermaker displays, plus schematics, electric propulsion and Mastervolt demonstrations, as well as the chance to see and hear our latest quiet, compact generator models up and running. We will also be able to show how the latest Mastervolt and CZone technology enables users to turn lights on or use a tablet or phone for remote monitoring for example."

Announced as a UK distributor for CZone last year, Fischer Panda's digital

switching offering enables boat owners to simplify their boat's electrical system by managing on-board equipment, such as generators, watermakers and HVAC, and changing the environment via a single touch-screen display or wireless device. The Verwood-based supplier can now supply its compatible Mastervolt power solutions and CZone control and monitoring functionality for customised system integration around a Fischer Panda generator purchase.

Fischer Panda's line of diesel gensets, which are suitable for vessels ranging from RIBs to superyachts, are the quietest and most compact marine generators available. The units run at a noise level of between just 52db(A) and 55db(A) at a 7m distance, depending on the capacity and type of the model. Units up to 25 kW feature a GRP sound insulation capsule with a 3-layer, 25mm thick '3D' sound insulation material as standard, with a thicker 5-layer version also available. Generators from 25 kW and above are supplied with a stainless steel sound-insulation Metal Professional Line (MPL) capsule. The MPL capsules are offered at an extra cost for generators from 6 kW to 25 kW.

The newer Panda 5000i and 4000s Neo generators use Fischer Panda's in-house designed water-cooled FPE320 single cylinder diesel engine which features integrated oil filter and synchronous alternator for even lower running noise levels and reduced vibration. Fischer Panda's variable speed iSeries 'Perfect Power' range incorporates next generation technology that improves fuel efficiency and benefits the environment.

Live demonstrations will be available at 11:30am every day at Fischer Panda Stand E020. For details about Fischer Panda's range of marine generators and other products go to www.fischerpanda.co.uk.

About Fischer Panda UK

Fischer Panda UK Ltd offers full-system design capability, servicing and aftercare as a leading distributor of diesel generators and a major supplier of the latest technology in air-conditioning systems, hybrid electric propulsion systems, integrated mobile power solutions and watermakers for a variety of commercial and leisure vessels.

Renowned worldwide as innovative, reliable and extremely quiet, the extensive Fischer Panda range of compact diesel generators includes its next generation highly efficient and powerful variable speed iSeries-Generators. Fischer Panda generators from the Panda 4000s Neo up to the next generation iSeries Panda 45i genset have passed type approval by members of the IACS (International Association of Classification Societies) board.

Other world-class products from Fischer Panda UK include desalination systems from Sea Recovery, HRO, and Village Marine, with models suitable for day-boats to warships and offshore platforms, plus air-conditioning systems from leading marine HVAC supplier Dometic, CZone digital switching and Mastervolt power solutions.

Fischer Panda UK is ISO UKAS 9000/1 accredited and operates from a purpose built 9,000 sq. ft facility in Verwood, Dorset. Its experienced engineers, sales and operational staff work with OEMs to develop integrated systems for custom vessels and offer specialist technical support and on-going aftercare to its customers.

Also active in the military and automotive sectors, the company works with UK MOD and other armies around the world providing solutions for specialist vehicle and land-based applications. Two thirds of Formula 1 mobile truck units install Fischer Panda generators, as do the BBC, Sky and many other mobile broadcasting vehicles.

Operating since 1977, Fischer Panda GmbH is headquartered in Paderborn, Germany. The Fischer Panda team covers more than 500 technicians and partners in over 90 countries worldwide.
