FLIBS 2020: Cox Powertrain and its Florida distributor, Ring Power to demonstrate the production CXO300

Fort Lauderdale International Boat Show, October 28th to November 1st, 2020, booth #1210, Yellow Zone, Engine Row

FORT LAUDERDALE, USA – October 26th, 2020 – Cox Powertrain's North American team returns to exhibit at the 61st Fort Lauderdale International Boat Show. During this year's show, the Cox team and its Florida distributor, Ring Power will be taking the opportunity to show potential key customers

the true power and durability of the CXO300 diesel outboard engine. Ring Power's CXO300 twin installation Intrepid Nomad 345 will be docked close to the show ready to take interested customers out for on-the-water demonstrations.

Having fully met EPA Tier III requirements for commercial and recreational applications, Cox's ground-breaking diesel outboard, the CXO300, went into production in May this year. With full-scale production now in place, engines are being delivered to key distribution territories throughout the USA and a program of customer demonstrations are planned to take place across the country from Florida to California.

"The production CXO300 engines are everything we expected and more. We cannot believe how refined the engines are," said Royal Hendrix, Sales and Marketing Specialist for Ring Power. "The stand-out qualities are their smooth and quiet ride whilst being very fast and responsive. Along with the performance enhancements, the new styling of the cowlings look great. We look forward to meeting customers new and old and show off these very impressive engines."

As the world's first high-performance diesel outboard engine, delivering 300hp at the propeller, the twin-turbo EPA Tier III approved CXO300 has been designed specifically for marine applications and is based on the proven technology of a 4-stroke, V8 architecture.

To find out more about on-water demonstrations during or after the show, visit the Cox and Ring Power teams at FLIBS on booth #1210 Yellow Zone, Engine Row. For further information, visit www.coxmarine.com

About Cox Powertrain

Cox Powertrain is a world-leading British design and engineering innovator of diesel engines developed for worldwide and multi-market applications.

Based on the South Coast of England, Cox Powertrain is backed by a solid base of private shareholders. As a result, the company has been able to implement a long-term development programme of ground-breaking new products.

Led by ex-Cosworth CEO, Tim Routsis, whose background lies in engine development in global automotive, aerospace and marine markets, the company's mission is to deliver a completely new concept in diesel engines that has the potential to revolutionise the marine market.

Cox's highly skilled team of engineers has decades of experience in combustion engines and understand the many difficulties customers are challenged with.

Cox's first ground-breaking diesel outboard performance engine, the CXO300, is the highest power density diesel outboard engine ever developed. As a high-power, single-fuel engine, the CXO300 delivers the same performance and efficiency of an inboard, but with the convenience and flexibility of an outboard.

Cox is supported by a worldwide distributor network made up of 35 distributors and 400 dealers.
