Glider: Inwards Marine Becomes Sales Partner For The Spellbinding Glider Range

Glider has announced that Inwards Marine, one of Europe's leading independent luxury yacht sales companies, has been appointed sole European dealer for its new and pioneering range of high-speed craft, the first of which is set to be unveiled at the London on Water Show in May. With offices in Southampton, London, Monaco, Palma and Genoa, Inwards is ideally placed to present the hand built British Glider range to Europe's elite boating market.

Inwards Marine represents several of the world's most prestigious yacht brands, offering a large portfolio of new and brokerage boat models between 30ft and 130ft. The addition of the Glider range enables Inwards Marine to offer customers something completely unique and simply beautiful.

The first Glider in the range will be the 50+ knots, 18 metre SS18 which delivers unrivalled performance and ride handling qualities with elegance and grace. The wave piercing hulls and superstructure have been developed using similar techniques to Formula One and aerospace design to provide exceptional aero and hydrodynamics for an unmatched smooth and comfortable ride at high speeds, regardless of sea conditions. This allows the Glider to cover long distances in the ultimate luxury of a hand crafted flight deck.

Commenting on the new sales partnership, Inwards Marine Managing Director, Richard Inwards said, "Gliders are unlike any other yacht in existence. With their unparalleled design and technological capabilities, they promise to be one of the most luxurious, high performance craft in the world and we are absolutely delighted to be part of this very exciting new British innovation that is set to revolutionise high speed luxury marine travel."

The Inwards Marine team will be welcoming guests to the world launch of the Glider SS18 at the London on-Water Show at St. Katharine Docks from 4th to 8th of May.
