Greensea Expansion Leads to Opening at Third Location

This release was originally issued on 30th August 2022 by Greensea Systems, Inc. prior to the company being merged into Greensea IQ on 1st September 2023. The content remains relevant and factual.

New location allows expansion and proximity to key customers

Richmond, Vermont, USA, 30th August 2022 - Marine robotics technology

specialist, Greensea Systems Inc. (Greensea), has opened a third location to accommodate its growing workforce and support strengthening its presence in the region. The new office, located at 4901 Morena Blvd, San Diego, California, provides ample room to accommodate the local team, new hires, as well as a spacious production area. It also allows Greensea to take advantage of the technology hiring pool found in Southern California in anticipation of further expansion.

Chelsea Allen, VP Operations, chose the location for its size and location. “This particular location provides the space that Greensea needs to grow in the area. We are now supporting multiple projects with military customers in San Diego, and being geographically close is undeniably a game changer. The space we chose is flex space, providing us with the needed shop space to support the hardware requirements of the projects and programs in the area. Greensea is rooted in collaboration and we believe the future of ocean robotics is rooted in it as well. This space provides an opportunity to strengthen that collaboration with our West Coast vendors, partners and customers.”

She continues, “Having a location in San Diego also gives us better access to a pool of very talented employees. We already have a number of full time employees working remotely in the area, who are very excited about a brick and mortar location opening up, and we expect to double our headcount here within the next year.”

This is the third location for Greensea which has offices in Richmond, Vermont, and Plymouth, Massachusetts. Greensea's recent contract wins, and expansion of its workforce have created several job openings. Interested parties can monitor these opportunities at greensea.com/careers.

Greensea Systems Inc. was founded in 2006 to design and create a commercially available open architecture software platform to break down siloed technology in the AUV and ROV environment. The resultant open architecture software, OPENSEA® with its a central library software suite, is the most powerfully integrated control and navigation technology available in the market today that is easy to use, easy to maintain, robust, and portable.

The company works with leading OEMs throughout the world providing the OPENSEA platform on hundreds of installations to the offshore and military industries.
