

The SM-18-R Mast Mount for Raymarine's Quantum Radar

Feb 09, 2016 15:11 GMT

Interform Marine: Announces Compatible Mounts for Raymarine's Quantum Radar

Unlike other mast mounts, the SM-18-R offers flexible raydome positioning thanks to unique mounting slots. This unrivalled feature allows the raydome to be optimally fitted close to the mast thus avoiding undue stresses on the mast, bracket and fixings.

The SM-18-R is made from marine grade Aluminium and chemically treated for extra durability, before being primed and powder coated white. It features

heavy duty feet which each use six rivets to secure the radar to the mast, enabling an extremely reliable and robust fit. The solid underbody of the mast mount provides a stable platform for the radar and allows any cables to be neatly hidden from view. The underbody comes pre-drilled enabling other accessories such as deck lights or horns to be fitted.

Priced at £270 Inc. VAT, the SM-18-R mast mount is just one of a wide range of off the shelf products which provide perfect mounting solutions for the Quantum Radar and can be purchased directly from Interform Marine. For further information and sales, contact Interform Marine on +44 (0) 1494 532335, Email: sales@interform-marine.co.uk or www.interform-marine.co.uk.
