JL Audio Marine Europe: JL Audio Adds 3-Channel Model to Line of Weatherproof Amplifiers

Following its US launch earlier this year, the new 3-channel marine amplifier is now available in Europe

Poole, United Kingdom – 9 October 2017 - JL Audio Marine Europe, the European distributor for the USA's favourite marine audio brand, JL Audio, has announced the addition of a three-channel system amplifier to JL Audio's MX Series of weatherproof amplifiers, which are now available in Europe.

Designed for marine use, the new MX 3-Channel ‘one-box solution’ system amplifier will comfortably drive a complete audio system consisting of a set of satellite speakers and a subwoofer.

In addition to the new three-channel system amplifier, the MX Series also offers two mono-block and two four-channel amplifiers. All MX amplifiers are engineered and built to withstand the most challenging environments—mud, rain, salt water, with corrosion-resistant materials and full IPX6 ratings against water intrusion. At the centre of each MX amplifier lies JL Audio’s highly efficient NexD™ Class D technology to deliver superb efficiency and sound quality from within a very compact package.

Since its introduction, JL Audio’s MX line has been a huge hit, enabling installations where space and exposure to the environment have been an issue in the past. The addition of a three-channel system amplifier adds a great option for single-amp system designs in marine applications.

For enquiries about JL Audio’s MX Series of marine grade amplifiers, contact JL Audio Marine Europe Tel: +44 (0) 1202 664 390 or visit www.jlaudiomarine.eu
