JL Audio Marine Europe: JL Audio UK Granted Sole European Distribution For JL Audio Marine

Over the last year, JL Audio UK has been progressively building the JL Audio brand in Europe, recently launching a dedicated European marine website, www.jlaudiomarine.eu, phase II of which is now live. With established specialist distributors in Italy, Spain, Greece and most recently, the Netherlands, the addition of the German markets will enable JL Audio UK to obtain brand consistency throughout Europe.

Commenting, JL Audio managing Director Paul Baker said, “Germany and the German speaking countries are a huge market for us and we are delighted to have had our distribution agreement extended. We are now in an excellent position to further strengthen our message to end users and boat builders in all European countries, persuading them to fit or upgrade to JL Audio’s marine systems for a far superior onboard sound and experience.

We will continue to cement our presence in Europe by seeking further country specific distributors. Appointing a new German distributor will be one of our first priorities.”

As the leading marine audio brand in the USA, the JL Audio range of speakers, amplifiers and sub-woofers are renowned for their superior sound and crystal clear quality on the water and are fast becoming the audio choice among many European boat builders and owners.
