JL Audio Marine Europe: Marine Audio has a new 'King of Bass'

USA's leading marine audio brand introduces a new 12" subwoofer to its popular M-Series range of marine audio products

Poole, United Kingdom – 22nd June 2017 - JL Audio Marine Europe has announced the launch of its largest and most powerful marine subwoofer, the M12IB6. As the latest addition to JL Audio's best-selling M-Series range, the new marine subwoofer measures a sizeable 12-inches in diameter, is capable of producing a staggering amount of quality bass and looks set to wipe the

floor with competing products.

Subwoofers are designed to bring an optimum depth of sound and a cleaner sound experience. JL Audio's M-Series are a proven match for the very best home entertainment systems, but with the significant difference of being engineered to withstand the toughest of marine environments, over a long period.

The M-Series subwoofers range in size from eight to twelve inches and all offer outstanding performance. The bigger the subwoofer, the better performance, however, the new 12-inch M12IB6 is in a class entirely on its own. With more than twice the displacement of JL Audio's potent 10-inch M-Series subwoofer, the 12-inch version can produce 6dB more bass output, which is a significant amount more. Designed to operate without a dedicated enclosure, the new 12-inch subwoofer boasts a four-inch voice coil and rugged suspension system, which is designed to deliver optimum linear excursion. This again reinforces the high-quality sound output, justifying its title as the 'King of Bass'.

Commenting on the launch of JL Audio's game-changing new subwoofer, Managing Director of JL Audio Marine Europe, Paul Baker said, "Our M-Series subwoofer performance consistently outshines the competition but the new 12-inch version without a doubt sets an entirely new benchmark for our rivals."

The new 12-inch subwoofer integrates seamlessly with JL Audio's marine audio product family and can be intuitively controlled either by its compact MBT-CRX Bluetooth™ controller and receiver, or the more sophisticated marine audio source unit, the MediaMaster®100s, which was introduced to the market last year to high acclaim.

Retail prices for the new 12" M-Series subwoofer range from €699.00 excluding tax. For more information and a list of European distributors, please call Tel: +44 (0)1202 664 390, Email: enquiries@jlaudiomarine.eu or visit www.jlaudiomarine.eu
