

JL Audio Marine Europe - Stingher RIB

Jun 22, 2016 15:20 BST

JL Audio Marine Europe: Stingher Ribs Chooses JL Audio as Preferred Audio Partner

Stingher RIBs are a luxury hand-crafted boat, custom built to match the exact requirements of the customer. Each craft is personalised with the owner's choice of equipment, layout and materials to create one of the best quality and highly finished Ribs on the market.

Commenting on the partnership, MRL RIBs Managing Director, Edward Pedley

said, “We pride ourselves in offering our customers the latest technology at the forefront of design and innovation so it is only natural that we are able to offer our customers the same audio experience that they would hear in their cars or at home. JL Audio delivers an unbeatable sound that surpasses other marine audio.”

JL Audio UK’s Managing Director Paul Baker said, “We are seeing an increasing appetite for marine quality audio systems from customers and we are delighted to be working with Stingher RIBs in the UK. Many boat builders do not offer the choice of a high quality, high fidelity audio system to customers and instead, offer more entry level systems which often don’t reflect the quality and investment of the customer’s boat purchase. Stingher joins a growing number of luxury boat builders that we are now working with throughout Europe to offer a far superior listening experience.”

JL Audio is USA’s number 1 marine audio manufacturer with many years’ experience in engineering speaker and amplifier systems specifically designed and tested for maritime use. The sound quality achieved is to the extremely high standards of quality home entertainment systems while totally suited to the tough environment of the external areas of a boat. The wide range of speakers suits every application from the flybridge of a superyacht to luxury powerboats, yachts, personal watercraft and RIB’s.
