

Anders Bruun (CEO, COACH Solutions) and Hege Skryseth (President, Kongsberg Digital) digitally sign the deal

Jul 01, 2020 07:00 BST

Kongsberg Digital acquires Danish maritime software company COACH Solutions

Oslo/Copenhagen, July 1st, 2020 – Kongsberg Digital has acquired COACH Solutions, a leading supplier of software solutions for vessel performance and monitoring. The new name will be KONGSBERG COACH Solutions.

COACH's vessel performance monitoring system was developed by Danish shipping company Clipper Group. In 2016 COACH was established as an independent company – COACH Solutions ApS – which has grown rapidly. Its

software currently has over 900 licenses running.

COACH supplies vessel operators, owners, pool managers and technical managers with a suite of tools for vessel performance, weather routing and noon reporting. COACH's solutions allow its customers to optimize energy consumption and receive constantly updated weather routing, assisting them in making large economic and environmental savings from their operations. The software tools are a natural fit with Kongsberg Digital's maritime portfolio, and the addition of Kongsberg Digital's resources and global network will accelerate COACH's growth.

"The strength of COACH Solutions' product offering is evident in their rapid growth. Their ability to deliver solutions that address the most urgent needs of their clients demonstrates the team's insight into the customers' pain points and level of digital maturity. COACH's software is highly complementary to the portfolio of maritime digital solutions we offer and will be of strategic importance in our further development," says Hege Skryseth, President of Kongsberg Digital.

"Joining Kongsberg Digital is a fantastic step forward for COACH, so we can continue delivering business value to our clients. Kongsberg Digital has an unrivaled ability to unlock the value of digital data with its Kognifai infrastructure. We at COACH very much look forward to joining the KONGSBERG family and being part of the journey of digitalizing the world fleet," says Anders Bruun, CEO of COACH Solutions.

As part of KONGSBERG, KONGSBERG COACH Solutions will be integrated in Kongsberg Digital's Maritime Digital Solutions portfolio, offering digitalization solutions to the maritime sector. The solutions will complement KONGSBERG's Vessel Insight data infrastructure solution and the Kognifai Maritime Ecosystem.

"COACH Solutions completes our range of maritime digital solutions to the merchant marine market. COACH Solutions' software is simple to install and use, giving customers key tools and a foundation on which to start their digitalization. We are happy to welcome the team onboard and look forward to working with KONGSBERG COACH Solutions as part of the KONGSBERG family," says Vignleik Takle, SVP, Maritime Digital Solutions at Kongsberg Digital.

"We are pleased to have been the early developer of COACH," says Peter

Norborg, Group CEO, Clipper Bulk A/S. *“Based on continuous input from our organization COACH has developed one of the industry’s leading software solutions for optimizing vessel performance and routing. But software development is not a core competence for Clipper, and we are glad that, in KONGSBERG, COACH will have a dedicated, long-term, technology-focused owner who can accelerate COACH’s development and deployment.”*

The acquisition was finalized on 30th June 2020.
