Kongsberg Digital on course to deliver an extensive simulator package to LNG fleet owner/operator GasLog

GasLog awards contract to KDI Maritime Simulation to supply integrated turnkey training solution involving K-Sim navigation, engine and cargo-handling simulator models

Horten, Norway, September 20th, 2018 Kongsberg Digital (KDI) and GasLog have agreed on the terms of a contract through which KDI will deliver a

comprehensive LNG simulator package designed to enable new levels of safety and operational training for GasLog's professional crews.

GasLog, an international owner, operator and manager of LNG carriers, operates 27 LNG vessels through its subsidiary, GasLog LNG Services and seven ships currently on order. The KDI contract represents a major commitment and investment on GasLog's part to provide a flawlessly accurate training environment for their crews, solely focused on LNG operation.

The scope of supply is based on an integrated, turnkey training solution featuring a K-Sim Navigation DNV Class A ship's bridge simulator and a K-Sim Engine Desktop simulator including the Steam Plant Dual Fuel LNG Carrier and the Diesel Electric Dual Fuel DE21 LNG models. The engine room models will be interfaced to a corresponding K-Sim Cargo LNG Liquefied Natural Gas Carrier-M cargo handling simulator. The simulators will be installed in GasLog's Technical Management HQ in Piraeus, Greece, with an entire floor specifically allocated for simulator training activities.

GasLog's investment in the K-Sim package emphasises the central importance of simulator training within the Greek LNG arena. In addition to GasLog, KDI provides K-Sim training solutions for Minerva Marine, Maran Gas Maritime, TMS Cardiff Gas and Tsakos Energy Navigation, meaning that it services more than half of the nine companies which constitute the Greek LNG carrier fleet.

"Greece is poised to become the largest and most significant shipping nation in the global LNG sector," says Tone-Merete Hansen, Sr. Vice President in Maritime Simulation, Kongsberg Digital, "and KDI is proud to be such an integral associate in support of this drive. Promoting and perpetrating the smart transportation and usage of a clean, economically efficient fuel ties in very closely with our corporate desire to enable safer, greener and more streamlined working practices."

"Straight from the outset, KDI's integrated simulator solution will allow our trainee crews to reinforce and build upon our core values of teamwork, quality of service, integrity and customer focus," adds Mrs Archontia Leni, the Competency Assurance Manager at GasLog. "Above all, as our company credo indicates, safety means the world to us – and KDI's innovative simulator training package will help us to establish and support a culture of crew protection and

environmental awareness that resonates throughout our entire organization.”
