Kongsberg Maritime: Limited Turnkey HUGIN AUV Package Now Available

- *Exclusive offer includes navigation, communication and subsea instruments in addition to all required operational and logistics components*

Kongsberg, Norway, 6th July 2017 – Kongsberg has announced the limited availability of a new turnkey HUGIN package, featuring the synonymous state-of-the-art Autonomous Underwater Vehicle (AUV) and all systems needed to store, transport, launch, operate and recover it from survey

operations anywhere in the world.

As a turnkey solution, the package provides significant cost-savings for organisations seeking to expand their autonomous underwater capabilities for diverse applications, from commercial surveying and pipeline inspection through to marine and climate research. At the heart of the package is a sophisticated HUGIN AUV with a 1000 metre depth rating, dive time of up to 12 hours as standard and a max speed of 5 knots.

The HUGIN AUV comes pre-installed with an extensive payload of navigation, communication and hydroacoustic equipment, including a Kongsberg EM 3002 multibeam echo sounder, EdgeTech Side Scan Sonar and EdgeTech Sub Bottom echo sounder. The complete package also includes a 20ft storage and shipping container, single stage stinger for easy launch and recovery, operator station, battery charger and tow fish & winch for communication.

“Although many HUGIN AUVs are delivered as turnkey solutions on a customised basis, this is the first time we have offered a HUGIN AUV as a pre-defined package with everything ready to go,” said Richard Mills, Director Sales Marine Robotics, Kongsberg Maritime. *“While providing significant cost savings, the customer can also be confident that the package provides high-end capabilities for multiple applications, backed-up by KONGSBERG’s expertise and global support network.”*

Availability of the turnkey HUGIN AUV package is strictly limited. Full details on the HUGIN AUV and all included equipment can be found [here](#).

About Kongsberg Maritime

Kongsberg Maritime is a global marine technology company providing innovative and reliable technology solutions for all marine industry sectors including merchant, offshore, subsea and naval. Headquartered in Kongsberg, Norway, the company has manufacturing, sales and service facilities in 20 countries.

Kongsberg Maritime systems for vessels cover all aspects of marine automation, safety, manoeuvring, navigation, and dynamic positioning. Subsea solutions include single and multibeam echo sounders, sonars, AUV/Underwater Robotics, underwater navigation, communication and camera systems.

Training courses at locations globally, LNG solutions, information management, position reference systems and technology for seismic and drilling operations are also part of the company's diverse technology portfolio.

In parallel with its extensive technology portfolio, Kongsberg Maritime provides services within EIT (Electro, Instrument & Telecom) engineering and system integration, on an EPC (Engineering, Procurement & Construction) basis.

Kongsberg Maritime delivers solutions that cover all aspects of technology underwater and on the water, aboard new build and retrofit vessels, and on

offshore platforms and rigs, often under a single supplier strategy called The Full Picture.

Kongsberg Maritime is part of Kongsberg Gruppen (KONGSBERG), an international, knowledge-based group that celebrated 200 years in business during 2014. KONGSBERG supplies high-technology systems and solutions to customers in the oil and gas industry, the merchant marine, and the defence and aerospace industries.
