NEW KEY APPOINTMENTS FOR OCEANOLOGY INTERNATIONAL Excel London, March 15-17th 2022

London UK - December 2021 - Oceanology International (Oi) is just three months away, starting on March 15th at Excel in London. Exhibitors are already keen to take part in this world leading event where industry, academia and government share knowledge and connect with the world's marine science and ocean technology communities.

As part of the drive to provide greater use and engagement in the extensive dockside facilities at Excel, organisers RX Global, have today announced the appointment of retired Royal Naval officer, Capt. David Wilkinson OBE as Dockmaster for the event. Capt. Wilkinson will oversee the entire water borne side of Oi which takes place in the Victoria Docks adjacent to Excel. With an impressive career in the Royal Navy, Capt. Wilkinson brings a high level of professionalism to the important logistical requirements of those exhibitors using the dock area and the safety and enjoyment of visitors.

Inside the exhibition halls the popular Oi conference programme will be developed and run by Carlos Fernandes, another highly experienced conference professional who joins RX Global as Conference Manager for Oi. The oceanology international technical conference is a world leading high level marine science and ocean technology programme of presentations that will run across the three days of the show. As a departure from previous events, for 2022, the conference programme will unfold on the show floor. This will ensure they are easy to find and remain as an integral part of the show. A varied programme is being devised to ensure that each element is relevant to visitors and packed with interesting content which will include the latest advancements in offshore subsea operations and technology

developments.

Spokesperson for Oi, Mike Enser said, “Exhibitors are able to access their individual accounts via the Oi website so they can update their profiles and upload images, white papers and product images. The team at Oi are delighted to be able to share that nearly **100 new companies** which have not joined us previously, will be showcasing their products and services at Excel next March. Our two new, high level appointments of Dockmaster and Conference Manager are also an indication of how important we view the management of this event, which will highlight the technology and professionalism available for Ocean projects above and below the water line for today and in the future”.

Ends.

About the Oceanology International Portfolio

Oceanology International is the world's leading marine science and ocean technology exhibition and conference. Beginning its journey in the UK in 1969, Oi has established itself as a truly global portfolio, with events running in London, San Diego and Abu Dhabi.

Oceanology International offers a series of global and regional forums where industry, academia and government share knowledge and connect with the marine technology and ocean science community, improving their strategies for exploring, monitoring, developing and protecting the world's oceans.

The Oceanology International portfolio includes:

- **Oceanology International - London:** Oceanology International is the world's largest exhibition and conference dedicated to serving all professionals working in the global marine science and ocean technology sector. The first Oceanology International was held in Brighton, in 1970. Today, its home is at ExCeL London.
www.oceanologyinternational.com
- **Oceanology International Americas - San Diego:** Returning to the thriving US blue economy hub of San Diego, Oi Americas is a growing regional showcase of technology solutions and services with an expected audience of 2,750 attendees from 30+ countries. www.oceanologyinternationalamericas.com
- **Oceanology International Middle East - Abu Dhabi:** Held at the Abu Dhabi National Exhibition Centre (ADNEC), the latest addition to the Oceanology International portfolio focuses on the Middle East and Indian Ocean region's growing application of ocean technology across a variety of end-user sectors from Ocean Science to Aquaculture to Offshore Energy and more.
