

The new Ocean Signal M100 MSLD

Jun 13, 2016 15:27 BST

## **Ocean Signal: Announces European Approval for New M100 MSLD**

Ocean Signal has announced that its new M100 Maritime Survivor Locating Device (MSLD) is fully certified for use in Europe. The man overboard device with Automatic Identification System (AIS) and 121.5MHz homing beacon has now started shipping to customers and is available from Ocean Signal's European network of dealers and distributors.

The latest device by the communication and safety at sea specialist is developed for the professional marine market and suitable for all offshore

and lone workers. Designed to unobtrusively attach to immersion suits and inflatable life jackets, the rugged man overboard device is ready for automatic activation on inflation of the jacket or on submersion when fitted to the suit.

Once activated, the M100 will transmit an alert to all AIS receivers and AIS enabled plotters in the vicinity, as well as sending a 121.5MHz homing signal, for a minimum of 12 hours. Waterproof up to a depth of 10m, the devices are operational between temperatures of -20°C and +55°C and can be stored at temperatures between -30°C and +70°C.

The M100 device is suitable for commercial use such as wind farm users, off shore workers, fishing fleets and fish farm workers, and helicopter transfers.

The Ocean Signal MSLD has been developed to withstand the harsh commercial environment and has a resilient, sturdy design to ensure ease of use and simple installation.

With a 2-year warranty, the compact MSLD measures 132mm x 53mm x 28mm to ensure it can be comfortably worn whilst in a working environment.

Additional Ocean Signal products at the show include the SafeSea S100 SART, V100 VHF and E100G EPIRB, plus the rescueME MOB1 man overboard device with AIS and DSC, the rescueME EDF1 electronic distress flare and rescueME PLB1 personal locator beacon.

For more information on the new Ocean Signal M100 MSLD and the Ocean Signal range of products, please visit Stand PB87 at Seawork, or go to the website at [www.oceansignal.com](http://www.oceansignal.com).

## **About Ocean Signal**

Communication and safety at sea specialist Ocean Signal™ is dedicated to providing the technology and quality of product that will set industry standards.

Ocean Signal's rescueME range of products, which includes the rescueME

PLB1, the rescueME MOB1, the rescueME EPIRB1, the rescueME EDF1 electronic distress flare and AIS Alarm Box, and SafeSea range of GMDSS products, including the E100 and E100G EPIRB, S100 SART and V100 handheld VHF radio, as well as the M100 and M100X professional MSLD, provide both recreational and commercial mariners with simple to use, compact and affordable life-saving solutions. All products are engineered by a highly experienced team of marine electronics professionals.

Ocean Signal products are trusted by high-profile sailors, rowers and powerboat racing teams. By providing vital safety and communication devices, the company has sponsored the 16-man crew of Triton with rescueME MOB1s in the 2015 Rolex Sydney Hobart Yacht Race, record-breaking sailor Andrea Mura in the single-handed OSTAR race, Mini Transat 2015 solo sailor Lizzy Foreman, Atlantic rowing duo Ocean Valour and Venture Cup offshore powerboat race team Cinzano.

Safety and communication products from Ocean Signal offer exceptional value, meeting or exceeding international technical and safety standards. Careful design and innovation provides commercial shipping, fishing and recreational users the confidence that their Ocean Signal equipment will work to, and beyond, their expectations when it is needed most.
