## **OCEANOLOGY INTERNATIONAL AMERICAS LAUNCHES CALL FOR CONTENT San Diego- CA, 14th-16th Feb 2023**

The organiser of Oceanology International Americas (OiA), RX Global has put out its Call For Content for the 2023 event and is looking towards the industry for content.

As part of the three-day conference program, OiA will run a series of

technical tracks exploring the latest developments in ocean technology and its applications in support of scientific research, safe and sustainable use of the ocean and ocean resources, and the protection of the marine and coastal environment. The technical track program will cover all stages of ocean technology innovation; seamlessly connecting technology push with application pull.

Conference Manager Carlos Fernandes said: “We’re able to analyse and therefore curate conferences and technical sessions that we are able to say with confidence, will be well attended by engaged audiences looking for new knowledge that will help propel their personal development and that of their businesses. OiA offers the perfect platform for the industry to share knowledge and exchange ideas in forums that are technically diverse, but with a common bond. We are seeking out solutions from the ocean technology, engineering and marine science communities that will help businesses to innovate and improve strategies for exploring, protecting and sustainably operating in the world’s oceans and waterways.

Now in its third edition, OiA is attracting significant interest from manufacturers, and the wider supply chain. Set in the heartland of the US Blue Tech economy, the event is the perfect platform for businesses to meet qualified leads from across the Americas and Asia. Content is centred on engineering and engineers, and set to attract visitors and exhibitors alike from a range of high growth ocean sectors including offshore wind, aquaculture, environmental and defense.

Dr Ralph Rayner OiA Conference Chair added, “Speaking at Oi Americas provides you with a perfect platform to connect with new and exclusive contacts – it’s like a VIP pass to your part of the ocean science and technology community.”

The 2023 event will see content delivered on: Sensors & Instruments, Vessels, Vehicles & Platforms, Data Communications, Data Analysis and more! If this sounds like you, please submit your paper and we’ll be in touch.

For further information or to submit a paper, please see [here](#)

Ends.

About the Oceanology International Portfolio

Oceanology International is the world's leading marine science and ocean technology exhibition and conference. Beginning its journey in the UK in 1969, Oi has established itself as a truly global portfolio, with events running in London, San Diego, Shanghai and Abu Dhabi.

Oceanology International offers a series of global and regional forums where industry, academia and government share knowledge and connect with the

marine technology and ocean science community, improving their strategies for exploring, monitoring, developing and protecting the world's oceans.

The Oceanology International portfolio also includes:

- Oceanology International - London: Oceanology International is the world's largest exhibition and conference dedicated to serving all professionals working in the global marine science and ocean technology sector. The first Oceanology International was held in Brighton, in 1970. Today, its home is at ExCeL London.  
[www.oceanologyinternational.com](http://www.oceanologyinternational.com)
- Oceanology International Middle East - Abu Dhabi: Held at the Abu Dhabi National Exhibition Centre (ADNEC), the latest addition to the Oceanology International portfolio focuses on the Middle East and Indian Ocean region's growing application of ocean technology across a variety of end-user sectors from Ocean Science to Aquaculture to Offshore Energy and more.
