

Next-generation open-array radar receives Innovation Award at Miami International Boat Show

Feb 18, 2022 10:20 GMT

Raymarine Cyclone Earns Accolades at MIBS

Fareham, UK (February 17, 2022) – A prestigious panel of judges from [Boating Writers International](#) (BWI) have honoured Raymarine with a 2022 Innovation Award from the [National Marine Manufacturers Association](#) (NMMA) for its [Cyclone™](#) open-array radar series. The announcement was made this morning at the 2022 [Discover Boating Miami International Boat Show](#) (MIBS).

The NMMA Innovation Award marks the fourth major accolade for Cyclone

since its introduction last October, following [Dame Design Award](#) honourable mention in the Marine Electronics and Marine-related Software category at last year's METSTRADE exhibition, a [Good Design® Award](#) bestowed by the Chicago Athenaeum Museum of Architecture and Design and Metropolitan Arts Press Ltd, and recognition as Editor's Choice for best overall new product in the 2022 Bonnier [Best Elex Awards](#).

Raymarine's Cyclone range encompasses the company's newest open-array radars. Featuring solid-state CHIRP pulse compression, Cyclone radars are conceived and crafted to give mariners the confidence to tackle the harshest conditions, gain distinct advantages in the hunt for fish, and safely navigate busy waterways.

We are honoured to have been recognized by NMMA and BWI's panel of judges with this Innovation Award," says Grégoire Outters, Vice-President and General Manager of Raymarine. "The Cyclone design was optimized through wind-tunnel testing and designed to break conventions in the open-array radar product category. Our new radar array and has been carefully executed by our team to demonstrate the clear advantages of our next-generation technologies. We challenged ourselves to create a radar that combines beauty with high performance, and the results are ground-breaking design, exceptional efficiency, and unmatched radar imagery."

Cyclone radars integrate seamlessly with Raymarine Axiom, Axiom+, Axiom Pro, and Axiom XL chartplotter multifunction displays and are available in 3-, 4- and 6ft arrays and in two high-power output options for each size. Cyclone open-array radars retail between €6,495 – €8,995 and are backed by Raymarine's industry-leading three-year warranty.

About Raymarine

Raymarine, a business of Teledyne FLIR, makes high-performance marine electronics for the recreational boating and light commercial marine markets. With a legacy of marine navigation technology spanning over 80 years, Raymarine products are renowned today for their ease-of-use, rugged design, and reliability. We are continually innovating to deliver best-in-class sensors and intelligent navigation systems - making boaters' time on the water safer and more fun. Our range of marine electronics is available through a global network of dealers and distributors. For more information, visit www.raymarine.com.

About Teledyne

Teledyne is a leading provider of sophisticated instrumentation, digital imaging products and software, aerospace and defense electronics, and engineered systems. Teledyne's operations are primarily located in the United States, Canada, the United Kingdom, and Western and Northern Europe. For more information, please visit www.teledyne.com.
