Smartgyro Announce Fabrizio Stifani as Research and Development Manager to Lead Team into the Next Phase of Innovation

Smartgyro, a leading innovator in gyro stabilization technology for the marine industry, is proud to announce the promotion of Fabrizio Stifani to the position of Research and Development Manager. As one of the founding members of the Smartgyro company and progressing on from his role as Senior Software & Hardware Engineer at Smartgyro, Fabrizio's new

management position will be responsible for heading up Smartgyro's efforts in research, innovation, and product development. With a proven track record in driving Smartgyro's research initiatives and contributing to the company's technological advancements since its inception in 2014, Fabrizio is well-placed to lead the R&D department into the next phase of ground-breaking innovations.

Commenting on his promotion Fabrizio remarks; "It is a very exciting time for Smartgyro as a business as we celebrate our ten-year milestone this year. I'm looking forward to leading and guiding our excellent R&D team in our continued efforts to improve and innovate Smartgyro's portfolio. It's a great honour for me to have been part of Smartgyro's history and I'm excited to be part of its future."

In his new role as the head of the Research and Development (R&D) team, Fabrizio's focus is on practical steps to drive efficiency and innovation. The current team, consisting of nine members in software and hardware, is committed to continuous improvement and development. The plan involves allocating more time to explore new technologies and automating Quality Control systems to free up time for creative work.

Following company growth with the move towards mass production, automation became a priority. This automation freed up resources to allow the team to focus more on development initiatives. Fabrizio envisions a creative, collaborative work environment where the team works closely with other departments to find practical solutions.

Functioning as a technical guide, Fabrizio is fostering a cohesive and productive atmosphere, uniting the team in their pursuit of innovation. Striking a harmonious balance between automation and creative ingenuity, the overarching objective is to not only meet but surpass set benchmarks, pushing the boundaries of what the Research and Development team can achieve.

Smartgyro, marking a decade of innovation this year, is a leading company in the design and development of a full range of highly advanced gyro stabilizers for recreational and commercial marine applications. The promotion of Fabrizio Stifani reaffirms the company's dedication to meeting the growing demand for exceptional products. With a legacy deeply rooted in pioneering design and the advancement of gyro stabilizers, Smartgyro is

poised for a promising future and continues to grow and expand. The progression of Fabrizio's role within Smartgyro, underscores the company's unwavering dedication in meeting the surging demand for high quality products, ensuring Smartgyro's mission to deliver unmatched stability on the water to boaters worldwide continues.
