## Smartgyro Reports High Demand in 2022 and reveals Autumn Show Schedule

*Gyro stabilization technology specialist has confirmed an increase in demand for its SG gyroscope units in 2022 ahead of a busy schedule of exhibitions in Europe and the U.S.*

**03 August 2022** – Smartgyro has reported that it has experienced the highest demand yet for its SG gyroscope units this year with orders exceeding expectations for 2022 as the company prepares to showcase the expanding range with a strong presence at the key autumn shows and exhibitions in

2022.

Demand is rising from dealers and boat owners across the world for the Smartgyro stabilizers, with a high number of orders across the range. Visitors to shows in Europe and the U.S. later this year will have the opportunity to view the stabilizers, discuss the current range – the SG20, SG40, SG60 and SG80 – and gain an insight into future developments. Members of the Smartgyro team will be available on the company stand at Cannes Yachting Festival, Genoa Boat Show, IBEX, United States Powerboat Show in Annapolis, Fort Lauderdale International Boat Show and METSTRADE.

Carlo Gazerro, Sales Manager, Smartgyro, said: “As awareness increases about the unique capabilities of the units, we are getting more orders and positive feedback from dealers and owners who are experiencing the benefits for themselves. As with all our gyro stabilizers, it not only provides improved comfort, but also makes installation seamless and easy and reduces downtime because it can be maintained and serviced while on board.”

“We are looking forward to a busy show season to meet current and potential customers and OEM partners so we can highlight our capabilities for installations on boats from 30 ft to over 80 ft. To keep up with this increasing demand, we are also excited to announce that Smartgyro will soon move to larger headquarters in La Spezia, to strengthen and increase production and warehouse capacity. This will result in key new hires in the engineering, production, and testing teams.”

YANMAR-backed Smartgyro is growing rapidly as installations increase following the rollout of the SG20 and SG60 last year. New dealers were recently confirmed in the Mediterranean region and the U.S. with imminent announcements on facility updates and personnel appointments at the Italy headquarters.

The advantages of the Smartgyro stabilizers include reduced vessel downtime with seamless installation and onboard maintenance, and innovative technology for enhanced experience and comfort on the water for boat owners and crew.

Smartgyro will be at Cannes Yachting Festival on Stand PAN310, Genoa Boat Show on Stand TL10, IBEX on Stand 1-506, United States Powerboat Show, Annapolis, Tent B 19 & Tent B 21, Fort Lauderdale International Boat Show,

Booth 403 and METSTRADE on Stand 11.120.

Ends
