YANMAR MARINE INTERNATIONAL has signed a three-year partnership agreement with the Nautical Institute of Brittany (INB)

Sep 09, 2019 13:19 BST

YANMAR Partners with the Nautical Institute of Brittany to Ensure Seamless Product Support

YANMAR MARINE INTERNATIONAL and the Nautical Institute of Brittany (INB) have signed a three-year partnership agreement to provide training on YANMAR's engines and new technologies.

The deal, signed on 24th July and agreed by the YANMAR France team and INB director Laurent Winisky, aims to train new technicians from across the YANMAR France distribution network. Close collaboration between the two

organisations will allow students to benefit from both the equipment and support provided by YANMAR and the technical infrastructure of the INB, which has facilities in Concarneau and Villefranche-sur-Mer.

As part of their long-term strategy, YANMAR is significantly increasing its presence in France. Having recently brought distribution for engines and parts in-house, the company is now moving to address the lack of qualified engine technicians within the industry. By working with a flagship training establishment such as the INB, YANMAR will ensure that, in addition to seamless distribution, expert mechanics are available to meet the installation and maintenance demands of dealers and boat owners.

About Yanmar Marine International

Yanmar Marine International is a top-tier provider of sailboat & small craft engines, powerboat engines, light-duty commercial engines, propulsion & manoeuvring systems and spare parts. Yanmar Marine International is part of Yanmar's Recreational Marine Business Unit, that also includes the Yanmar Group companies VETUS, Mastry Engine Center and Flexofold. VETUS, based in the Netherlands, is a global provider of marine engines, generators and technical equipment for recreational marine craft and small commercial vessels. Mastry Engine Center, based in Florida (USA), is a provider of engineering, service re-power and parts covering a wide range of marine engine, powertrain and equipment applications. Flexofold, based in Denmark, is a manufacturer of superior low-drag folding (shaft drive and saildrive) propellers for sailboats and multihull yachts. More information:
